General Instructions :

- i) The Question-cum-Answer Booklet consists of 9 objective and subjective types of questions.
- ii) Space has been provided against each objective type question. You have to choose the correct choice and write the complete answer in the space provided.
- iii) For subjective type questions enough space for each question has been provided. You have to answer the questions in the space.
- iv) Follow the instructions given against both the objective and subjective types of questions.
- v) Candidate should not write the answer with pencil. Answers written in pencil will not be evaluated (Except Graphs, Diagrams & Maps).
- vi) In case of Multiple Choice, Fill in the blanks and Matching questions, scratching / rewriting / marking is not permitted, thereby rendering to disqualification for evaluation.
- vii) For reading the questions 15 minutes of extra time has been provided.

Note : Answer all the questions.

1. Fill in the blanks with the correct symbol/word(s) by selecting from the choices given in the brackets : 10 × 1 = 10

- i) Two parts of a program can be connected by

(arrow, rectangle, circle)

Ans : _____

- ii) The translator which converts assembly level language to machine level languages is

(compiler, assembler, interpreter)

Ans : _____

iii) An unformatted output function is

(*putchar, scanf, printf*)

Ans : _____

iv) A set of simple statements enclosed in a pair of braces is known as

(*expression statement, comment statement, block of statement*)

Ans : _____

v) One control structure within the other control structure is called

(*beginning, nesting, looping*)

Ans : _____

vi) An operator which has the highest priority is

(*unary operator, binary operator, ternary operator*)

Ans : _____

vii) The variable declared inside any function is termed as

(*global variable, integer variable, local variable*)

Ans : _____

[Turn over

viii) An unconditional branching statement is

(*for, goto, while*)

Ans : _____

ix) FORTRAN is a

(*high level language, middle level language, low level language*)

Ans : _____

x) RAM and ROM are

(*volatile memories, serial memories, semiconductor memories*)

Ans : _____

2. a) How are the computer languages classified ?

b) Define software and name the types.

4

c) What do you understand by C language ?

2

3. a) Define a character constant. Mention the two types of character constants.

4

- b) Draw the following symbols used in system flow chart : 4
- i) Printed document
 - ii) On-line storage
 - iii) Video display unit
 - iv) Telecommunication link.

c) What is a lexical element ?

2

4. a) Define translator. Name the two types of translators.

4

b) List any four symbols used in flow charts.

4

- b) Write a C program to find smallest of 3 numbers using conditional operator. 6

- b) Write a program to print the number from 1 to 3 using loop statements. 6

- b) Write a program to convert Fahrenheit to Celsius.
