

AIIMS NOV 2008 MDS REVIEW QUESTION PAPER

1. radioluceny at the apex of a vital tooth
2. radio opacity periapical
3. dentin conditioners
4. acid etch causes
5. 8 year old child with green stains
6. shape of access opening of mand moar with 4 canals
7. not a periodontal pathogen
8. most common developmental maxillary cyst
9. which is benzodiazepne antagonist
10. fluride from GIC reacts wid?
11. bleeding patient in emergency,
12. tongue control lost, maanagement?
13. mandibular fracture tension/ compression / rotation/ torsion?
14. DIFOTI use
15. gel used for etching not liquid y?
16. irregulr dentin ,interglobular dentin
17. etchant protected 4m entering pulp
18. radiopacity below3 month old amalgam restr.
19. .semipermeable sulcular epi. leads 2
20. multiple radiolucencies in 30 yr old lady due 2
21. floating teeth seen in
22. etching leads 2 reduction in
23. eutectic mixture used in
24. postoperative effect is minimum wid
25. oral pigmentation seen in
26. gingivoplasty nt req in all except
27. plaque contains

AIIMS NOV 2008 MDS REVIEW QUESTION PAPER

28. bilat. canine area fracture in md. is pushed backwards by action of muscles
29. nt effective against MRSA
30. in penicillin allergic pt penicillin nd erythromycin nt given together why
31. tt. 4 a pt having badly carious left LI wid inability of opening left eye ,fluctuant swelling on left side of face, fever
32. sorting of pt.of trauma on basis of need of care nd availability of resources
33. prevention of long term widrawl effects of morphine is prevented by
34. which GA cause rapid recovery wid max consciousness
35. muscle not originated from oblique line of thyroid
36. t lymphocytes primarily do
37. T2N0M0 signify stage 2
38. plaque contain-bacteria & food products,
39. infectious mononucleosis- ebv
40. suger found-sucrose
41. oral pigmentation-addison disease
42. avulsed tooth-wash with saline
43. painful socket- irrigation & medicated gauge
44. hair on end appearance-thallesemia
45. radiographic feature in gingivitis- normal bone
46. 8mm pocket- pseudo pocket
47. root # in the apical third of permanent teeth usually ----- vital n functional
48. trauma from occlusion least likely to affect----- epithelial attachment
49. adenoid odontogenic tumor called as----- adenoameloblastoma
50. radicular cyst always asso. with.----- non vital tooth
51. abrasion most common on----- maxillary arch left side
52. nitrous oxide nt used alone in GA----- difficulty to maintain adequate O2 con.
53. floating tooth----cherubism
54. loading dose dependant on---vol of distribution

AIIMS NOV 2008 MDS REVIEW QUESTION PAPER

55. mode
56. koch's postulate
57. modification of koch's postulate
58. difference between etchant and gel
59. bone grafting done before canine extraction or after in cleft case
60. use of paired t test or unpaired in two groups
61. a tooth in which rct was started 2 yrs back , radiolucency does not resolve reason , curettage done
62. periapical radioopacities around molar
63. patient on steroid therapy , why would u give
64. in # mand part behind # line acts as
65. material which has high tensile strength but low compressive strength called
66. a girl using teething gel _ acrodynia?
67. mixture of 2.5% + 2.5% used in
68. gasserian block
69. mand block
70. eutectic mixture used in anesthesia of intact skin
71. injury which does not extend to dermis.... contusion
72. bilat. canine area fracture in md. is pushed backwards by action of muscles, ant belly digastric genioglossus geniohyoid
73. nt effective against MRSA clotrimazole
74. in penicillin allergic pt penicillin nd erythromycin nt given together why, erythromycin reduce d action of penicillin
75. tt. 4 a pt having badly carious left LI wid inability of opening left eye ,fluctuant swelling on
76. left side of face, fever.... incision and drainage
77. sorting of pt.of trauma on basis of need of care nd availability of resources....triage
78. prevention of long term withdrawl effects of morphine
79. gingivoplasty nt req in all except acute necrotising ulcerative gingivitis

AIIMS NOV 2008 MDS REVIEW QUESTION PAPER

80. organism absent in pdl diseases?????
81. semipermeable sulcular epi. leads 2 both of the above
82. multiple radiolucencies in 30 yr old lady due 2..?
83. GA cause rapid recovery wid max consciousness.?
84. muscle not originated from oblique line of thyroid....sup constrictor
85. t lymphocytes primarily do...produce lymphokine and
86. T2N0M0 signify stage 2 .
87. trauma from occlusion is least likely to affect.
88. ...most commonly observed
89. .koch's postulate.....
90. modification of koch's postulateby socransky
91. during emergency
92. not available all of the following can be give except...
93. material which has high compressive strenght but low tensile strenght.....
94. trauma from occlusion least likely to affeact epithelial attachment
95. ga with max recovery..... propofol
96. which drug is nt used 4 MR resistant
97. horse serum injection is injected to arm ...
98. improper obturation or leakage 4m the canal
99. drug not given in hepatic insufficiency and cirrosis
100. drug nt acetylated..... metoclopramide
101. chromic catgut..... delayed resorption
102. loading dose.... vol of distribution
103. which is a objective scale..... facial pain;knee jerk; r reflex; hiii
104. tongue managed in person who has laost voluntary control
105. nevus which is malignant
106. oat is also k/a

AIIMS NOV 2008 MDS REVIEW QUESTION PAPER

107. feature of cardiac muscles except?
108. vertical radiolucent line bw ci and li
109. # alv bone on fixation produce at alv border;;;;;; tension;compression; shear; rotational
110. bone grafting done in cleft palate patients-
111. pulp is
112. prothrombin time is decreased in:
113. Radiographic appearance of sinusitis shows:
114. The microorganisms that first inhabit the tooth surface are:
115. which one used in periodontal disease patient
116. in 6 year old caries experience is due to
117. in patient with ch renal failure drug dose nt altered; ca channel blocker
118. phosphoethanolamine release in urine hypophosphotasia
119. emergency traceostomy below cricoid
120. partially penetrate dermis'

i NOTE : ACTUAL AIIMS PAPER CONSISTS OF ONLY 90 QUESTIONS.SOME OF THE Q ARE REPEATED SO THE NUMBER IS MORE. QUESTIONS & ANSWERS(IF ANY) MAY NOT BE RELIABLE..... THEY ARE MORE OF JUST HINTS AND SHOULD NOT BE BLINDLY FOLLOWED.
