

2006-SKR ENGINEERING COLLEGE
B.E/B.TECH II SEMESTER MODEL EXAM PAPER
INTERNET PROGRAMMING
COMPUTER SCIENCE ENGINEERING

JULAY-2006

TIME-3HOUR
MARK-100

PART: A (2×10 = 20)

1. What is called Internet and define its uses?
2. Differentiate TCP and UDP protocols?
3. What are the four components of URL specification?
4. Difference between CGI and servlets?
5. What is called stream and define its types?
6. What is meant by RMI?
7. Identify and correct the errors in the following segment of code if(age>=65);
document.writeln("age is greater than or equal to 65");
else
document.writeln("age is less than 65");
8. What is called DHTML?
9. State the difference between GET and POST requests?
10. What is called JDBC and its types?

PART: B (5×16 = 80)

11. a) (i) Explain TCP and UDP protocols in detail
(ii) Explain CGI in detail?
OR
b) (i) Define MIME?
(ii) What is meant by SGML and define it?
12. a) (i) state the difference between C and JAVA?
(ii) What is called Stream and its types?
(iii) Explain client / Server application?
OR
(i) What is called pop3 and its uses?
(ii) Define the Life cycle of Applets? Write a simple program that sets the foreground and background colors and outputs a string.
- 13 a) (i) Describe the forms and frames in HTML?
(ii) Explain arrays and functions using JavaScript?
OR
b) (i) Create a simple web page using HTML ?
(ii) Define JavaScript?

14.a) (i) Explain Event model of dynamic HTML in detail?

(ii) How we can handle the multimedia data?

(iii) what is the uses of java script?

OR

b) Explain object models and collections using DHTML in detail.

15. a) (i) What is called servlet ?

(ii) Explain one of the web servers in detail?

OR

b) What is meant by JDBC & explain its type in detail?
