GENERAL ENGLISH

Princess Chandravati was very beautiful. She loved all kinds of ornaments and always wanted to wear the most precious and lovely jewels. Once, a jeweller came to the palace and gifted the king a wonderful diamond necklace. It glittered with big and small diamonds. It was certainly a very expensive necklace. The princess fell in love with it as soon as she saw it. So the king presented it to her.

From that day on, the princess always wore that necklace, wherever she went. One day before going for a swim in the pond, she took the necklace off and put in the hands of her oldest and the most trustworthy servant. "Hold this and be careful. This is the most **precious** necklace in the whole world," she said. The servant was an old woman. She sat under a tree, holding the ornament tightly and waited for the princess. It was a hot afternoon and the servant was very tired so she **dozed off** under the tree. Suddenly the servant felt that someone was **tugging** at the necklace and she woke up with a start. She looked around but no one was there and the necklace was gone. Scared out of her wits, the old servant started screaming. On hearing her scream the royal guards rushed to her. She pointed towards the direction in which the thief may have gone and the guards ran off that way.

There was a poor and dim-witted farmer walking on the same road. As soon as he saw the royal guards running towards him, he thought that they wanted to catch him and started running. But he was not a strong man and could not outrun the hefty guards. The royal guards caught him in no time. "Where is it?" they demanded, shaking him.

"Where is what?" the poor farmer stammered back. "The necklace you stole!" thundered one of the royal guards. The farmer had no idea what they were talking about. He only understood that some precious necklace was lost and he was supposed to have it. He quickly replied, "I don't know where it is now. I gave it to my landlord."

The guards ran towards the landlord's house. "Give us the necklace right now!" the guards demanded of the fat landlord. "Necklace? I don't have any!" the stunned landlord replied. "Then tell us quickly who does," demanded the soldiers. In order to get the royal guards off his back, the landlord pointed towards a priest who was walking by his house and said, "He does." The guards now **caught hold** of the priest who was walking towards the temple and thinking about the lunch he had just eaten. The priest was stunned when one of the burly guards jumped on him and asked about the necklace. He remembered that the minister, Bhupati, was at the temple. He took the guards to the temple and pointed towards the praying minister, "I gave it to him," he said. Bhupati too was caught and all four men were thrown in jail. The chief minister of the kingdom knew Bhupati well and was sure that Bhupati would never steal. He decided to find out who the culprit was. He hid near the jail where all four men were put and heard them talking. First, Bhupati asked the priest, "Panditji, why did you say that you gave the necklace to me? I was quietly praying at the temple and now you have landed me in jail for no fault of mine." The priest looked apologetic. He pointed towards the landlord and said, "I didn't know what to say. He set the guards on me. I was simply passing by his house and was on my way to the temple." The land lord looked at the priest sheepishly. Then he turned towards the poor farmer and yelled, "You lazy good-for-nothing man! Why did you say that I had the necklace?" The farmer, **trembling** under the angry gaze of all three men, said, "I was just walking home. The guards caught me and I did not

know what to say." On hearing, this conversation, the chief minister understood that all the four men were innocent. He immediately ordered the royal guards to search thoroughly, near the pond. The guards searched high and low till they saw something glinting on the tree. On the tree sat a monkey with the princess' favourite necklace around his neck. 105. (2) Required number of students = 3280
106. (3) Total students in the institute A = 2080
Required percentage
= $\frac{520}{2080} \times 100 = 25$
107. (2) Required average
= $\frac{2130}{5} = 426$
108. (5) Required average
= $\frac{373}{7} = 53$
110. (5)

2	4080
2	2040
2	1020
2	510
5	255
3	51
	17

∴ 4080 = 2 × 2 × 2 × 2 × 2 × 5 × 3
× 17 = 16 × 15 × 17
= 15 × 16 × 17
111. (5) Length = x metre
Breadth = (x - 8) metre
∴ 2(x + x - 8) = 180
⇒ 2x - 8 = 90
⇒ 2x = 90 + 8 = 98
⇒ x = 49 metre
∴ Breadth = 49 - 8 = 41 metre
∴ Area of the rectangle
= 49 × 41 = 2009 sq. metre
112. (1) B's 1 day's work

137 × 4 + 5 = 548 + 5 = 553
553 × 4 + 5 = 2212 + 5 = 2217
114. (2) The pattern is :
8 × 7 = 56
56 × 6 = 336
336 × 7 = 2352
2352 × 6 = 14112
14112 × 7 = 98784

116. (1) The pattern is :
2916 ÷ 3 = 972
972 ÷ 3 = 324
324 ÷ 3 = 108
108 ÷ 3 = 36
118. (2) S.P. of the article
= $\frac{390 \times 103.12}{100} = \text{Rs. } 402$
119. (1) Gain per cent
= $\frac{4590 - 3910}{3910} \times 100 \approx 17\%$
120. (3) 12 years ago,
A's age = 15x years
B's age = 13x years
After 19 years from today
 $\frac{15x + 12 + 19}{13x + 12 + 19} = \frac{23}{22}$
⇒ $\frac{15x + 31}{13x + 31} = \frac{23}{22}$
⇒ 330x + 682 = 299x + 713
⇒ 330x - 299x = 713 - 682
⇒ 31x = 31
⇒ x = 1
∴ Sum of their present ages
= 15x + 13x + 24 = 52 years

- (iv) Some kites are not gliders \Rightarrow Particular Negative (O-type).

146. (4) All lines are circles.

Some circles are squares.

A + I \Rightarrow I-No Conclusion

147. (2) No glider is a kite.

All kites are birds.

E + A \Rightarrow O₁-type of Conclusion

"Some birds are not gliders."
Conclusion II is Converse of the first Premise.

148. (1) All roots are ferns.

No fern is a plant.

A + E \Rightarrow E-type of Conclusion
"No root is a plant."

Conclusion I is Converse of it.

149. (2) Both the Premises are Particular Affirmative (I-type). No Conclusion follows from the two Particular Premises.

Conclusion II is the Converse of the first Premise.

150. (5) All solids are liquids.

All liquids are gases.

A + A \Rightarrow A-type of Conclusion
"All solids are gases."

This is Conclusion I.

All liquids are gases.

No gas is plasma.

A + E \Rightarrow E-type of Conclusion
"No liquid is plasma."

This is Conclusion II.

151. (4) The following changes occur in the subsequent figures :

- (1) to (2) (2) to (3)
- (4) to (5) (5) to (6)

(3) to (4)

152. (4) In the subsequent figures respectively five, four, three, two, one... design(s) is/are inverted.

153. (3) From Problem Figure (1) to (2) the leftmost design move to the rightmost position and the two units interchange positions. The other three designs are inverted. Similar changes would occur from Problem Figure (5) to Answer Figure.

154. (5) The plane of four squares rotates through 90° and 45° clockwise alternately. The other two designs move one-half and one step in clockwise direction alternately. These two designs rotate through 90° and 180° clockwise alternately.

155. (1) From Problem Figure (1) to (2) the plane of designs rotates through 135° anticlockwise. From Problem Figure (2) to (3) the plane of designs rotates through 90° clockwise and the first and the last designs interchange positions. From Problem Figure (3) to (4) the plane of designs rotates through 45° anticlockwise. From Problem Figure (4) to (5) the second design moves to the fifth position. These four steps are continued in the subsequent figures.

156. (5) The following changes occur in the subsequent figures :

- (1) to (2) (2) to (3)
- (4) to (5) (5) to (6)

(3) to (4)

INV \Rightarrow Inverted.

157. (5) The shading pattern of the cube is repeated after the Problem Figure (4) in reverse order. In each subsequent figure the designs from right side move to the front side and one more design is added. The pattern of these designs is repeated after four figures.

158. (3) In the subsequent figures respectively two and one design(s) is/are deleted from the two lower lines while three, four, five, six, seven..... designs from the upper two lines rotate through 90° anticlockwise.

159. (1) In the subsequent figures respectively one and two letter(s) is/are replaced with new letters alternately. The numbers descend stepwise and ascend in one step. The numbers remain at the same position for two figures. In the first step the two pairs of numbers interchange positions among themselves. In the second step the numbers get arranged in reverse order.

160. (4) In Answer Figure the quadrilateral would be shaded in the middle and the lower side. The other four designs move in the following manner :

- (1) to (2) (2) to (3)
- (4) to (5) (5) to (6)

(3) to (4)
