

ENSURE THAT THIS QUESTION BOOKLET CONTAINS 150
QUESTIONS SERIALLY NUMBERED FROM 1 TO 150.
PRINTED PAGES 32.

1. The three large openings of diaphragm are at levels of which of the following thoracic vertebrae?
 - (A) T6 T8 T10
 - (B) T8 T9 T10
 - (C) T9 T10 T11
 - (D) T8 T10 T12

2. Which of the following is the only muscle which connects the pelvic girdle and vertebral column to upper limb?
 - (A) Trapezius
 - (B) Deltoid
 - (C) Latissimus dorsi
 - (D) Teres major

3. Which of the following is the second largest vein of the body?
 - (A) Superior vena cava
 - (B) Inferior vena cava
 - (C) Portal vein
 - (D) Femoral vein

4. Islets of langerhans are found maximum in which part of pancreas?
 - (A) Head
 - (B) Neck
 - (C) Body
 - (D) Tail

5. Primary piles appear at which of the following position?
 - (A) 3,7,11 o'clock
 - (B) 3, 6, 9 o'clock
 - (C) 4, 9, 12 o'clock
 - (D) 6, 9, 12 o'clock

6. In which of the following condition, the patient walks on inner border of foot which is everted and abducted?
- (A) Talipes equinus
 - (B) Talipes valgus
 - (C) Talipes calcaneus
 - (D) Talipes varus
7. Which one of the following is/are due to the closure of “semilunar valves” and mark the onset of ventricular diastole?
- (A) First heart sound
 - (B) Second heart sound
 - (C) Both first and second heart sound
 - (D) Third and fourth heart sounds
8. All the following can be measured by simple spirometry **except**:
- (A) Inspiratory reserve volume
 - (B) Expiratory reserve volume
 - (C) Residual volume
 - (D) Tidal volume
9. Which is main function of albumin?
- (A) Maintain plasma osmotic pressure
 - (B) Maintain plasma hydrostatic pressure
 - (C) Coagulation of blood
 - (D) Immunity
10. Testes does not produce:
- (A) Estradiol
 - (B) Testosterone
 - (C) Fructose
 - (D) Inhibin
11. Organ of corti is concerned with:
- (A) Vision
 - (B) Smell
 - (C) Taste
 - (D) Hearing

12. Surfactant production in lungs starts at:
- (A) 20 weeks
 - (B) 28 weeks
 - (C) 32 weeks
 - (D) 34 weeks
13. In which type of enzyme inhibition the inhibitor closely resembles the real substrate?
- (A) Uncompetitive inhibition
 - (B) Competitive inhibition
 - (C) Non competitive inhibition
 - (D) Irreversible inhibition
14. Most of the functions of this vitamin are related to its antioxidant property. It protects the unsaturated fatty acids (PUFA) from peroxidation. Which is the vitamin?
- (A) Riboflavin
 - (B) Vitamin E
 - (C) Vitamin D
 - (D) Vitamin K
15. ----- cycle essentially involves the oxidation of acetyl CoA to CO_2 and H_2O .
- (A) Citric acid
 - (B) Lactic acid
 - (C) Pyruvic acid
 - (D) Acetic acid
16. Urea is synthesized in liver by urea cycle. Urea has two amino groups(NH_2):
- (A) One derived from NH_3 and other from asparatate
 - (B) One derived from fumarate and other from pyruvic acid
 - (C) Both derived from homogentisate
 - (D) One derived from glutaraldehyde other from phenylalanine

17. Which of the following has close similarity with the structure of glycogen?
- (A) Structure of amylopectin with more number of branches
 - (B) Structure of cellulose with more number of branches
 - (C) Structure of chitin
 - (D) Structure of amylase
18. High density lipoprotein (HDL) and enzyme lecithin cholesterol acyltransferase (LCAT) are responsible for:
- (A) Synthesis and transport of pyruvic acid
 - (B) Transamination and deamination of amino acids
 - (C) Transport and elimination of excess cholesterol from the body
 - (D) Conversion of pyruvate to lactate
19. Abbreviation used for "empty stomach" is:
- (A) Vac. ven
 - (B) Habt
 - (C) Vesp
 - (D) Utend
20. Volume I of HPI was published in the year:
- (A) 1970
 - (B) 1971
 - (C) 1972
 - (D) 1973
21. Sialogogue is the drug:
- (A) That increases gastric juice secretion
 - (B) That increases salivary secretion and flow
 - (C) That helps in expulsion of gas
 - (D) That increases secretion of sweat
22. The synonym for white soft paraffin is:
- (A) Paraffinum molle album
 - (B) Paraffinum molle flavum
 - (C) Paraffinum molle arcticus
 - (D) Paraffinum molle

23. Drug strength of sulphur tincture is:
- (A) 1/10
 - (B) 1/50
 - (C) 1/667
 - (D) 1/5000
24. 91.42% alcohol concentration is equivalent to:
- (A) 10 over proof
 - (B) 10 under proof
 - (C) 57.5 over proof
 - (D) 60 over proof
25. All potencies below 3X of Group N-I, N-II, N-III and N-IV should bear a life period of:
- (A) Three months from the date of manufacturing
 - (B) Six months from the date of manufacturing
 - (C) Three years from the date of manufacturing
 - (D) Five years from the date of manufacturing
26. Variolinum belongs to:
- (A) Group N-I
 - (B) Group N-II
 - (C) Group N-III
 - (D) Group N-IV
27. Keratin is tumour marker for:
- (A) Carcinoma cervix
 - (B) Neurofibroma
 - (C) Rhabdomyosarcoma
 - (D) Choriocarcinoma
28. Dead bone seen in chronic osteomyelitis is:
- (A) Sequestrum
 - (B) Parathormone
 - (C) Sinus debris
 - (D) Contracture

29. Atheromatous plaque is common in all **except**:
- (A) Circle of Willis
 - (B) Internal carotids
 - (C) Lower abdominal aorta
 - (D) Internal mammary
30. Reversible changes in the cells with loss of polarity and altered cell size and shape is:
- (A) Metaplasia
 - (B) Hyperplasia
 - (C) Dysplasia
 - (D) Desmoplasia
31. Piecemeal necrosis is seen in:
- (A) Alcoholic cirrhosis
 - (B) Indian childhood cirrhosis
 - (C) Chronic pancreatitis
 - (D) Chronic active hepatitis
32. Autosplenectomy occurs in:
- (A) Alpha thalassemia
 - (B) Beta thalassemia
 - (C) Sickle cell disease
 - (D) Paroxysmal nocturnal haemoglobinuria
33. All are transmitted by milk except:
- (A) Tuberculosis
 - (B) Brucellosis
 - (C) Q fever
 - (D) Leishmaniasis
34. Kyasanur Forest Disease is caused by:
- (A) Dogs
 - (B) Jackal
 - (C) Pigs
 - (D) Monkeys

35. Primary antibody response is mediated by:
- (A) IgG
 - (B) IgA
 - (C) IgM
 - (D) IgE
36. Which of the following is **not** live vaccine?
- (A) BCG
 - (B) MMR
 - (C) Polio
 - (D) Salk vaccine
37. Death can be caused by stoppage of respiration for:
- (A) 1 minute
 - (B) 2 minutes
 - (C) 3 minutes
 - (D) More than 4 minutes
38. Which of the following is devoid of DNA?
- (A) Mature RBC
 - (B) Monocyte
 - (C) Lymphocyte
 - (D) Polymorph
39. The grain size of gun powder is designated by which of the following English letter?
- (A) A
 - (B) F
 - (C) S
 - (D) Z
40. Exposure of long bones to intense heat causes:
- (A) Colles' fracture
 - (B) Compound fracture
 - (C) Curve fracture
 - (D) Pathological fracture

41. Grade the diffuse axonal injury (DAI) in a patient with coma of 06-24 hours:
- (A) Concussion of brain
 - (B) Mild DAI
 - (C) Moderate DAI
 - (D) Severe DAI
42. Haemoconcentration is suggestive of:
- (A) Fresh water drowning
 - (B) Salt water drowning
 - (C) Dry drowning
 - (D) Immersion syndrome
43. Tactile hallucination is the characteristic of:
- (A) Epilepsy
 - (B) Motor neuron disease
 - (C) Temporal lobe epilepsy
 - (D) Cocaine psychosis
44. The age group of persons considered to be dependent on the economically productive age group is:
- (A) Persons below 15 years and above 65 years
 - (B) Persons below 18 years and above 60 years
 - (C) Persons below 10 years and above 60 years
 - (D) Persons below 12 years and above 70 years
45. Normal human Ig is used for prevention of:
- (A) Measles and Hepatitis A
 - (B) Influenza and Hepatitis B
 - (C) Rubella and Hepatitis A
 - (D) Diphtheria and Tetanus
46. Incorrect about Revised National TB Control Programme (RNTCP) is:
- (A) Internationally recommended DOTS strategy was adopted in RNTCP
 - (B) Supply of drugs was strengthened
 - (C) Introduction of X-ray for diagnosis of TB
 - (D) Objective of RNTCP was at least 85% cure rate of infectious TB cases

47. Under Bio-Medical Waste (Management & Handling) Rule 1998 the category No. 1 waste refers to:
- (A) Discarded medicines and cytotoxic drugs.
 - (B) Liquid waste.
 - (C) Waste sharps.
 - (D) Human anatomical waste.
48. The feature which is not characteristic of the rash of chicken pox is:
- (A) Rash is most abundant on trunk
 - (B) Rash is most abundant centrifugally
 - (C) Rapid evolution of rash
 - (D) Pleomorphism
49. In a one year old child (weight 9 kgs) suffering from dehydration, the amount of ORS solution required during the first four hours is:
- (A) 600-800 ml
 - (B) 200-400 ml
 - (C) 400-600 ml
 - (D) 800-1200 ml
50. One of the recent major changes made to the "Millennium Development Goals" configuration is inclusion of a specific target on:
- (A) Universal primary education
 - (B) Ensuring environmental sustainability
 - (C) Universal access to reproductive health
 - (D) Promotion of gender equity
51. According to Boericke which medicine has the symptom "menses too early, too profuse, long lasting, dysmenorrhea, pain increases with establishment of flow"?
- (A) Tuberculinum
 - (B) Medorrhinum
 - (C) Millifolium
 - (D) Psorinum

52. According to Boericke which medicine has a symptom "beating of pulse throughout the body especially in right thigh"?
- (A) Ferrum phos
(B) Spigellia
(C) Veratrum viride
(D) Viburnum opulus
53. According to Boericke, which medicine acts as an oxygen carrier and a catalyzer, hence used in wasting disease? It also increases and stimulates phagocytes:
- (A) Vanadium
(B) Phosphorus
(C) Ammonium carb
(D) Carbo veg
54. Fissures of nipples in nursing women is found in:
- (A) Graphites, Sepia, Ratanhia
(B) Thuja, Chamomilla, Sulphur
(C) Silicea, Sepia, Calcaria carb
(D) Graphites, Merc sol, Calcaria carb
55. Match list I with list II and select the correct answer using the codes given below the list:
- | Medicine | | Family |
|----------------|---|---------------|
| a Agnus castus | 1 | Solanaceae |
| b Cyclamen - | 2 | Myristicaceae |
| c Nux moschata | 3 | Vervenaceae |
| d Tabacum | 4 | Primulaceae |
- (A) a-3, b-4, c-2, d-1
(B) a-4, b-2, c-3, d-1
(C) a-1, b-4, c-2, d-3
(D) a-1, b-2, c-3, d-4
56. "Sleepy but cannot sleep" is a feature of:
- (A) Belladonna, Causticum, Opium
(B) Belladonna, Chamomilla, Stramonium
(C) Belladonna, Stramonium, Nux vomica
(D) Causticum, Coffea, Stramonium

57. Which of the following is incorrect regarding concordant relationship of remedies?

- (A) China and Calcarea
- (B) Ignatia and Zincum met
- (C) Pulsatilla and Sepia
- (D) Belladonna and Apis mel

58. Apt to choke when eating or drinking is found in:

- (A) Sepia and Nat phos
- (B) Nat phos and Acid nitric
- (C) Acid nitric and Bismuth
- (D) Anacardium and Cannabis sativa

59. Match list I with list II and select the correct answer using the codes given below the list.

	Symptoms		Medicines
a	Backache relieved from bending forward	1	Acetic acid
b	Backache relived from lying on abdomen	2	Rhus tox
c	Backache relieved from lying on back	3	Lobelia inflata
d	Backache relived from lying on something hard or firm	4	Ruta

- (A) a-1, b-4, c-3, d-2
- (B) a-3, b-1, c-4, d-2
- (C) a-3, b-1, c-2, d-4
- (D) a-4, b-1, c-2, d-3

60. Which of the following statement is not correct?

- (A) Hepar sulph is complementary to Calendula in injuries to soft parts
- (B) Hepar sulph antidotes bad effects of mercury and other metals
- (C) Hepar sulph is unhealthy, suppurating moist and not sensitive to touch
- (D) Hepar sulph sweat is sour, offensive, easily on every mental or physical exertion

61. Which remedy follows Thuja in condyloma and sycotic affections?

- (A) Graphites
- (B) Conium
- (C) Sabina
- (D) Camphor

62. Always feel better by walking slowly about, although weakness obliges the patient to lie down is symptom of:
- (A) Ferrum met
 - (B) China
 - (C) Ars Alb
 - (D) Tarentula
63. Which of the following are used in diphtheria and tonsillitis beginning on left and extending to right side?
- (A) Lachesis, Baryta mur, Phosphorus
 - (B) Lachesis, Lac can, Sabadilla
 - (C) Lachesis, Sabadilla, Hepar sulph
 - (D) Lachesis, Sabadilla, Merc cyn
64. Who gave the statement that Iodum acts best in goiter when given after full moon or when moon is waning?
- (A) Hering
 - (B) Kent
 - (C) Lippe
 - (D) Farrington
65. Anacardium follows and is followed by which of the following remedy?
- (A) Argentum met
 - (B) Zincum met
 - (C) Platina
 - (D) Plumbum
66. Symptoms disappear while eating is a feature of:
- (A) Anacardium, Psorinum, Kali phos
 - (B) Anacardium, Sulphur, Kali phos
 - (C) Psorinum, Sulphur, Ignatia
 - (D) Ignatia, Anacardium, Sepia

67. Which remedy antidotes effects of local applications of tar, suffocation from gas?
- (A) Bovista
 - (B) Kreosote
 - (C) Merc sol
 - (D) Borax
68. Which medicine is said to destroy septic germs in painful gangrenous wounds?
- (A) Ars alb
 - (B) Sulphuric acid
 - (C) Pyrogen
 - (D) Nitric acid
69. Dislocation of patella on going up stairs is an indication of:
- (A) Cannabis indica
 - (B) Cannabis sativa
 - (C) Cocculus indica
 - (D) Ledum pal
70. Violent priapism with excessive pain is found in:
- (A) Picric acid and Caladium
 - (B) Picric acid and Cantharis
 - (C) Sulphur and Nitric acid
 - (D) Phosphorus and Caladium
71. Apathetic, indifferent, low spirited, weak memory from sexual abuses is found in:
- (A) Nat mur, Staph, Phos acid
 - (B) Staph, Nit acid, Sulphur
 - (C) Anacardium, Iodum, Nat mur
 - (D) Aurum met, Ignatia, Lachesis

72. Which remedy should be given after Amm. Carb, Carbo veg and Bovista in dysmenorrhoea with vomiting and purging?
- (A) Carbo animalis
 - (B) Camphor
 - (C) Mag phos
 - (D) Verat alb
73. Constipation, no desire, stool-large, hard is a feature of:
- (A) Chelidonium, Verat alb, Plumbum
 - (B) Chelidonium, Plumbum, Opium
 - (C) Plumbum, Bryonia, Nux vomica
 - (D) Veratrum alb, Sulphur, Bryonia
74. All are in complementary relationship **except**:
- (A) Lycopodium and Iodum
 - (B) Belladonna and Calacarea carb
 - (C) Ipecac and Cuprum
 - (D) Nux vom and Zincum met
75. Who stated that "The drugs which have present marked similarities in action though dissimilar in origin. These are said to be 'concordant'. Drugs which have a concordant relation may follow each other well"?
- (A) E. A. Farrington
 - (B) Clarke
 - (C) J. T. Kent
 - (D) Elizabeth Wright
76. Which of the following is not correct in relation to remedies in series?
- (A) Merc – Hepar – Silicea
 - (B) Suph – Ars – Sulph
 - (C) Arnica – Rhus tox – Calc
 - (D) Puls – Silicea – Sepia

77. Match list I with list II and select the correct answer using the codes given below the list:

	Name of drug		Part used
a	Aethusa	1	Whole plant
b	Cyclamen	2	Gum resin
c	Asafoetida	3	Ripe fruit
d	Capsicum	4	Roots

- (A) a-1, b-2, c-3, d-4
(B) a-4, b-1, c-3, d-2
(C) a-1, b-4, c-2, d-3
(D) a-4, b-1, c-2, d-3

78. Which of the following statement is **incorrect**?

- (A) Medicinal plant should be gathered in localities to which they are indigenous
(B) Wild plants are more effective and possess more medicinal virtue than those cultivated in garden
(C) Plants should not be collected during early morning dew
(D) For cleansing of drug material after collection large amount of water should be used for washing

79. Match list I with list II and select the correct answer using the codes given below the list:

	Name of alkaloid		Source
a	Brucine	1	Tabacum
b	Nicotinum	2	Opium
c	Narcotinum	3	Nux vomica
d	Veratrinum	4	Sabadilla

- (A) a-3, b-1, c-2, d-4
(B) a-3, b-1, c-4, d-2
(C) a-4, b-1, c-2, d-4
(D) a-2, b-1, c-3, d-4

80. Match list I with list II and select the correct answer using the codes given below the list:

Name of drug		Family
a Jonosia ashoka	1	Ranunculaceae
b Helleborus niger	2	Apocynaceae
c Cicuta virosa	3	Umbelliferae
d Vinca minor	4	Leguminosae

- (A) a-1, b-2, c-3, d-4
(B) a-4, b-1, c-3, d-2
(C) a-4, b-3, c-2, d-1
(D) a-1, b-4, c-2, d-3
81. A patient suffering from polyarthralgia developed hyperpyrexia followed by headache and thereafter morbilliform lesions all over the body after action of homoeopathic remedy. Such a recording of follow up history is termed as:
- (A) Parenthesis
(B) Catamnesis
(C) Nemesis
(D) Pyrosis
82. According to Hahnemann, which scale of potency is capable of producing medicines of highest development of power and mildest action?
- (A) Centesimal scale
(B) Decimal scale
(C) Fifty millesimal scale
(D) Straight potency
83. Which of the following is a criteria for Hering's direction of cure?
- (A) From within outwards
(B) From below upwards
(C) From less important to more important organ
(D) In order of onset of symptom

84. Match the following:

- | | | | |
|-----|------------|---|-------------------|
| I | Broussseau | a | Aude sapere |
| II | Horace | b | Series in degrees |
| III | J.T. Kent | c | Blood letting |

- (A) I-a, II-b, III-c
(B) I-c, II-a, III-b
(C) I-c, II-b, III-a
(D) I-b, II-a, III-c

85. Which of the following concepts validates homoeopathic concept of potencies?

- (A) Beneviste's concept of memory of water
(B) Cartesian dualism
(C) Freudian concept of Id
(D) Carl Jung's concept of synchronicity

86. A patient complains of 'all gone sensation' in epigastrium with hunger and has burning hands and feet. The predominant miasm in this case is:

- (A) Psora
(B) Pseudo psora
(C) Sycosis
(D) Syphilis

87. Alternation of remedies was done by Hahnemann in epidemic of:

- (A) Measles
(B) Scarlet fever
(C) Typhus
(D) Cholera

88. A patient with superficial folliculitis developed increased sleepiness, violent vomiting with severe colicky pain in abdomen after administration of homoeopathic medicine. The next plan of treatment should be:

- (A) Antidotal remedy
(B) Wait and watch approach with no intervention required
(C) Cognate remedy
(D) Complementary medicine

89. The concept of 'causam tolle' was practiced in:
- (A) Isopathy
 - (B) Allopathy
 - (C) Homoeopathy
 - (D) Nosodotherapy
90. A patient suffering from allergic rhinitis developed allergic bronchitis after a course of homoeopathic treatment. This is referred to as:
- (A) Pheromone
 - (B) Trituration
 - (C) Pathotropism
 - (D) Vicariation
91. Consider the following statements. Which of the statement is/are true?
1. Entelechy is a principle given by Hahnemann
 2. The action of homoeopathic medicine promotes entelechy
 3. Entelechy is a fundamental principle of holism
- (A) 1 only
 - (B) 2 only
 - (C) 1 and 3
 - (D) 2 and 3
92. Classification of acute diseases is described in:
- (A) § 4
 - (B) § 26
 - (C) § 73
 - (D) § 150
93. *Causa chronicorum morborum* refers to:
- (A) Cause of chronic disease
 - (B) Morbid pathology
 - (C) Causa occasionalis
 - (D) Indisposition

94. A patient of chronic bronchitis developed marked craving for apples since the onset of complaint. Such a symptom is known as:
- Accidental symptom
 - Accessory symptom of patient
 - Pathological symptom
 - Accessory symptom of medicine
95. Unfavourable interaction of two homoeopathic medicines when used one after another is described as:
- Complementary
 - 'Follow well' reaction
 - Placebo interaction
 - Inimical
96. Hahnemann's concept of obstacle to cure is best exemplified by Robert's concept of:
- Auxiliary symptom
 - Anaphasic reaction
 - Deflected current
 - Potentiality change
97. Match the following:
- | | | | |
|-----|-------------|---|--------------------------|
| I | Hippocrates | a | Organon |
| II | Paracelsus | b | Similia Similia Curantur |
| III | Aristotle | c | Doctrine of Signatures |
- I-a, II-c, III-b
 - I-c, II-a, III-b
 - I-c, II-b, III-a
 - I-b, II-c, III-a
98. Homocopathic law of minimum is corroborated by the following concept of toxicology:
- Hormesis
 - Bioaccumulation
 - Acute toxicity
 - Biomagnification

99. A child developed sudden nasal coryza following exposure to dry cold air. Which element of Boenninghausen's schema of symptom is present in this case?
- (A) Quando
 - (B) Cur
 - (C) Quis
 - (D) Quibus auxiliis
100. After administration of appropriate homoeopathic remedy in a case of acute viral conjunctivitis, which of the following Kent's observation is most likely to be observed?
- (A) 3rd
 - (B) 6th
 - (C) 9th
 - (D) 12th
101. Johann Ernst Stapf is well known for:
- (A) Publication of first homoeopathic journal
 - (B) Proving of cinchona
 - (C) Work on nosodes
 - (D) Tautopathy
102. Consider the following statements. Which of the statement is/are true?
- I Karl Aegidi, one of Hahnemann's disciples, proposed administering a mixture of two homoeopathic remedies
 - II Aegidi made Hahnemann think of including 'double remedies' in fifth edition of Organon of Medicine
 - III Aegidi's concept of 'double remedies' was accepted in sixth edition of Organon of Medicine
- (A) I only
 - (B) II only
 - (C) I and II
 - (D) I and III

103. Tall, lean patient with supple belongs to which constitution?
- (A) Carbonic
 - (B) Metaphorical
 - (C) Satirical
 - (D) Longilinear
104. Loss of appetite belongs to which class of symptom?
- (A) Kentian particular symptom
 - (B) Hahnemann's general symptom
 - (C) Boenninghausen's complete symptom
 - (D) Garthe Boericke's determinative symptom
105. Which of the following miasm was described by Hahnemann as 'hydra-headed'?
- (A) Psora
 - (B) Sycosis
 - (C) Syphilis
 - (D) Pseudo psora
106. Mean, secretive nature of a patient with jealousy and suspiciousness is pathognomic of which miasm?
- (A) Syphilis
 - (B) Sycosis
 - (C) Pseudo psora
 - (D) Psora
107. The following concept is applicable in homoeopathic treatment of secondary stage of psoric miasm:
- (A) Surrogate
 - (B) Local application
 - (C) *Acqulia aequilis curentur*
 - (D) Anamnesis

108. Which famous surgeon recommended Constantine Hering to publish a book against homoeopathy?
- (A) Walter
 - (B) James Krauss
 - (C) Robbi
 - (D) Hughes
109. Prescribing anti-tussive medicine in a patient suffering from dry cough, dyspnoea with recurrent sneezing and running nose exemplifies:
- (A) Symptomatic treatment
 - (B) Isopathic treatment
 - (C) Homoeopathic treatment
 - (D) Auto-innoculation therapy
110. Kent's sixth observation is most likely to be observed in a case of:
- (A) Indisposition
 - (B) Impetigo contagiosa
 - (C) Subtotal thyroidectomy
 - (D) Acute viral pharyngitis
111. Boenninghausen's concept of quibus auxiliis corresponds to concept of:
- (A) Concomitance
 - (B) Modalities
 - (C) Cause
 - (D) Seat of disease
112. A patient was prescribed Arsenic album on basis of keynote symptom of burning better by heat since he complained of burning sensation in nape of neck, upper chest, palms and feet, which were all better by hot fomentation. This illustrates the application of:
- (A) Deductive logic
 - (B) Law of minimum
 - (C) Arndt Schultz law
 - (D) Inductive logic

113. The school of philosophy, founded by Edmund Husserl, which studies all manifestations of an occurrence rather than one particular aspect is known as:
- (A) Paleopathology
 - (B) Anthropology
 - (C) Phenomenology
 - (D) Microbiology
114. Nature's self-healing capability is referred to as:
- (A) Ab usu in morbis
 - (B) Vis medicatrix natura
 - (C) Aude sapere
 - (D) Minister natura
115. Action of homoeopathic medicine belongs to the realm of:
- (A) Substantialism
 - (B) Materialism
 - (C) Idealism
 - (D) Physiological
116. Cold sponging in state of hyperpyrexia is:
- (A) Enantiopathic
 - (B) Heteropathic
 - (C) Isopathic
 - (D) Antipathic
117. Match the following:
- | | | | |
