Correct Option	2

Q. No. 19 0131019	Which one of these is used in bed wetting in children ?
Option 1	Imipramine
Option 2	Chlorpromazine
Option 3	Levodopa
Option 4	Tacrine
Correct Option	1

Q. No. 20 0131020	What is the most common site of rupture of a cerebral aneurysm with resulting subarachnoid hemorrhage (SAH) ?
Option 1	Anterior cerebral artery
Option 2	Middle cerebral artery
Option 3	Anterior communicating artery
Option 4	Posterior communicating artery
Correct Option	3

Q. No. 21 0131021	Which of these used in multidrug resistant tuberculosis ?
Option 1	Ciprofloxacin
Option 2	Penicillin
Option 3	Metronidazole
Option 4	Linezolid
Correct Option	4

Q. No. 22 0131022	When caring for a patient who is on a mechanical ventilator, the nurse should monitor the patient for which of the following complications ?
Option 1	Pulmonary embolus

Option 2	Pleural effusion
Option 3	Flail chest
Option 4	Pneumothorax
Correct Option	4

Q. No. 23 0131023	A patient comes to the clinic with reports of acute pain and loss of vision in the right eye. The adult-gerontology primary care nurse practitioner informs the patient that these symptoms require
Option 1	immediate referral to an ophthalmologist.
Option 2	assessment with a split lamp.
Option 3	examination with an otoscope.
Option 4	treatment with several ophthalmologic agents.
Correct Option	1

Q. No. 24 0131024	Which of the following blood group is universal recipient?
Option 1	A
Option 2	B
Option 3	AB
Option 4	O
Correct Option	3

Q. No. 25 0131025	Deficiency of which of the following vitamin during pregnancy may cause neural tube defects ?
Option 1	Folic acid
Option 2	Riboflavin
Option 3	Niacin
Option 4	Thiamine
Correct Option	1

Q. No. 26 0131026	During the initial care of rape victims the following are to be considered by a nurse except
Option 1	maintain a non-judgmental approach.
Option 2	assure privacy
Option 3	touch the client to show acceptance and empathy.
Option 4	accompany the client in the examination room.
Correct Option	3

Q. No. 27 0131027	Shick test is carried out to determine
Option 1	polio
Option 2	pertusis
Option 3	meningitis
Option 4	diphtheria
Correct Option	4

Q. No. 28 0131028	Which of the following is most common side effect of aspirin ?
Option 1	Gastrointestinal bleeding
Option 2	Constipation
Option 3	Nystagmus
Option 4	Urinary incontinence
Correct Option	1

Q. No. 29 0131029	The intestinal juice secreted in the intestine containing digestive enzymes is known as
Option 1	Succusertericus
Option 2	Juicy fluid
Option 3	Succus juice
Option 4	Chyme
Correct Option	1

Q. No. 30 0131030	All are the non-modifiable risk factors for atherosclerosis except
Option 1	high cholesterol intake
Option 2	age
Option 3	heredity
Option 4	gender
Correct Option	1

Q. No. 31 0131031	The first drug of choice for a patient admitted with status epilepticus is
Option 1	phenytoin
Option 2	carbamezepine
Option 3	diazepam
Option 4	sodium valproate
Correct Option	3

Q. No. 32 0131032	Which of the following is not a saturated fatty acid ?
Option 1	Oleic acid
Option 2	Palmic acid
Option 3	Lauric acid
Option 4	Stearic acid
Correct Option	1

Q. No. 33 0131033	A 69-year-old female patient reports dyspareunia. Physical examination reveals sparse hair, an introitus that admits two fingers, and a pale, dry vagina. The adult-gerontology primary care nurse practitioner's initial management is to recommend
Option 1	daily douching.

Option 2	topical hormonal cream.

Option 4	topical antifungal cream.
Correct Option	2

Q. No. 34 0131034	Which of the following is antibody occurs as pentameric structure ?
Option 1	IgA
Option 2	IgG
Option 3	IgE
Option 4	IgM
Correct Option	4

Q. No. 35 0131035	Which of the following is not typical anti-psychotic and does not have marked extra pyramidal side effects ?
Option 1	Chlorpromazine
Option 2	Fluphenazine
Option 3	Clozapine
Option 4	Haloperidol
Correct Option	3

Q. No. 36 0131036	In case of heparin over dose, which agent should be used ?
Option 1	Diltiazem
Option 2	Protamine
Option 3	Imferon
Option 4	Warfarin
Correct Option	2

Q. No. 37 0131037	In case of development of urticaria one-half hour after the blood transfusion has begun, the first action by the nurse should be
Option 1	to slow the rate of infusion
Option 2	to administer anti-histaminic agent
Option 3	to note vital signs
Option 4	to stop the infusion
Correct Option	4

Q. No. 38 0131038	When haemoglobin combines with oxygen, it is known as
Option 1	oxyhemoglobin
Option 2	deoxyhemoglobin
Option 3	reduced hemoglobin
Option 4	oxidized haemoglobin
Correct Option	1

Q. No. 39 0131039	Which of the following monoclonal antibody is approved for the treatment of asthma ?
Option 1	Bevacizumab
Option 2	Omalizumab
Option 3	Cetuximab
Option 4	Trastuzumab
Correct Option	2

Q. No. 40 0131040	A 55-year-old man was admitted after a motor vehicle accident with multiple injuries. His friend reported that he had been seeing a psychiatrist for an unknown diagnosis. He stated that the patient sometimes gets "hyper" for no reason, and becomes violent and sometimes is depressed. Of the following, which general psychiatric disorder is characterized by a pattern of aggression or violence which includes irritability, agitation, and violent behavior during manic or psychotic episodes ?
Option 1	Schizophrenia
Option 2	Bipolar disorder
Option 3	Delusional disorder
Option 4	Depression
Correct Option	2

Q. No. 41 0131041	Which of the following is not filtered out during glomerular filtration ?
Option 1	Glucose
Option 2	Water
Option 3	Salts
Option 4	Proteins
Correct Option	4

Q. No. 42 0131042	For a 6 month pregnant lady, which of the following are contraindicated ?
Option 1	Retinol
Option 2	Tetanus toxoid
Option 3	Folic acid
Option 4	Ferrous sulphate
Correct Option	1

Q. No. 43 0131043	Recommended site of administration of DPT in infants is
Option 1	deltoid
Option 2	gluteal
Option 3	forearm
Option 4	intravenous
Correct Option	1

Q. No. 44 0131044	Spironolactone produces
----------------------	--------------------------------

Option 1	hypernatremia
Option 2	hyperkalaemia
Option 3	hyponatremia
Option 4	hyprkalaemia
Correct Option	2

Q. No. 45 0131045	The agent contraindicated with warfarin treatment is
Option 1	aspirin
Option 2	ranitidine
Option 3	codeine
Option 4	isaphgol
Correct Option	1

Q. No. 46 0131046	After obtaining 3 L of fluid from a client via paracentesis, the nurse would be alert for which complication ?
Option 1	Encephalopathy
Option 2	Bleeding from site
Option 3	Vascular collapse
Option 4	Respiratory distress
Correct Option	3

Q. No. 47 0131047	Which of the following is the most prominent feature of public health nursing ?
Option 1	Public health nursing focuses on preventive, not curative, services.
Option 2	Services are provided free of charge to people within the catchment area.
Option 3	The public health nurse functions as part of a team providing a public health nursing services.
Option 4	It involves providing home care to sick people who are not confined in the hospital
Correct Option	1

Q. No. 48 0131048	The lung function tests are determined by
Option 1	tonometer
Option 2	spirometer
Option 3	sphygmomanometer
Option 4	barometer
Correct Option	2

Q. No. 49 0131049	Which of the following part of eye contains rhodopsin pigment ?
Option 1	Rods
Option 2	Cones
Option 3	Lens
Option 4	Iris

Correct Option	1
Q. No. 50 0131050	Which of the following agent causes discolouration of teeth if taken with milk ?
Option 1	Tetracycline
Option 2	Penicillin
Option 3	Metronidazole
Option 4	Ciprofloxacin
Correct Option	1
