Marking Scheme 2016

[Official]

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

General Instructions:

- Marking scheme is the final document for all references with regard to evaluation and cannot be altered under any circumstance.
- The answers given in the marking scheme are SUGGESTIVE, Examiners are expected to award marks for all alternative correct Solutions/Answers conveying the similar meaning.
- All programming questions have to be answered with respect to Java Language only.
- In Java, ignore case sensitivity for identifiers (Variables / Functions / Structures / Class Names).
- In SQL related questions :
 - A. Both ways of text/character entries should be acceptable. For example: "AMAR" and 'amar' both are acceptable.
 - B. All date entries should be acceptable for example: 'YYYY-MM-DD', 'YY-MM-DD', 'DD-Mon-YY', "DD/MM/YY", 'DD/MM/YY', "MM/DD/YY", 'MM/DD/YY' and {MM/DD/YY} are correct.
 - C. Semicolon should be ignored for terminating the SQL statements.
 - D. Ignore case sensitivity for commands.
 - E. Ignore headers in output questions.

1	(a)	Two doctors have connected their mobile phones to transfer a picture file of a person suffering from a skin disease. What type of network is formed? Which communication media out of Coaxial cable, Optical fiber, Bluetooth, Satellite link should be used to transfer the file?	2
	Ans	PAN Bluetooth	
		(1 mark each for each correct answer)	
	(b)	State reason why Star topology requires more cable length than Bus topology.	2
	Ans	Star topology involves a central hub or switch to which all individual node(s) are connected with individual cable, therefore more cable is required in Star topology than Bus topology.	
		(2 marks for correct answer) Note : Full 2 marks to be allotted if reason represented with the help of diagram	
	(c)	"Open Source Software developers work for the good of community". Is this statement true? Give reason.	2
	Ans	Yes, the above statement is true. <ul style="list-style-type: none"> ● Open source developers choose to make the source code of their software publicly available to which many developers can view/use the software and also modify it. ● Users can download the software free of cost. So, they work for the good of the community.	

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

		<i>(1 mark for stating 'Yes')</i> <i>(1 mark for correct reason)</i>	
	(d)	What happens during 'Domain Name Resolution'?	2
	Ans	The process of translating a domain name to an IP address is called Domain name resolution.	
		<i>(2 marks for correct answer)</i> <i>Note : Full 2 marks to be allotted if reason is represented with the help of example.</i>	
	(e)	How is 'Denial of service' attack, a threat to Network security?	2
	Ans	Denial-of-service (DoS) is an indication that an attacker (hacker) or unauthorised user has attempted to connect/access data and thus suggests a threat on network security.	
		<i>(2 marks for correct answer)</i> <i>Note : 1½ mark for only stating what is DoS .</i>	
2	(a)	Identify the odd one out of the following statements. State reason for your choice. i) switch ii) do while iii) while iv) for	1
	Ans	i) switch switch is a selection statement but others are looping / iteration statements.	
		<i>(½ mark for identifying)</i> <i>(½ mark for reason)</i>	
	(b)	What is the difference between setVisible() and setEnabled() methods?	1
	Ans	setVisible() sets the visibility of a component i.e. whether the component will be visible or hidden on form. setEnabled() sets whether the component can trigger an event or not.	
		<i>(1 mark for correct answer)</i> <i>Note : Full 1 mark to be allotted if difference explained with the help of example.</i>	
	(c)	What is the difference between the following statements i) and (ii) i) a = 5; ii) if (a == 5) x = 3;	1
	Ans	In i) variable a is being assigned the value 5 whereas in ii) a is being checked for equality with 5 OR In i) assignment operator is used and in ii) relational operator '==' is used.	
		<i>(1 mark for mentioning correct difference)</i>	
	(d)	Write the output in jTextField1 if decode is 3.	1

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

	<pre> switch (depcode) { case 1 : allowance = 4000; break; case 2 : allowance = 3200; break; default : allowance = 1000; } jTextField1.setText(" "+allowance); </pre>	
Ans	1000	
	<i>(1 mark for correct answer)</i>	
(e)	Sandhya is creating a webpage. She is entering HTML code on her computer. In between, she keeps pressing 'Refresh'/'Reload' button on her browser. What is the purpose?	2
Ans	The purpose of 'Refresh'/'Reload' is to view the changes in the webpage.	
	<i>(2 marks for correct answer)</i>	
(f)	What does 'XML' stand for? How is the purpose of HTML different from XML?	2
Ans	XML stands for eXtensible Markup Language. HTML is used to create web pages / display data whereas XML is used to describe/store/transport data.	
	<i>(1 mark for expanding XML) (1 mark for correct difference) Note : Full 1 mark to be allotted if purpose of only HTML is specified.</i>	
(g)	Write Java code (statements) to declare Y as integer variable. Then, assign the value 30 to a variable Y. Increase the value of Y by 5 and store the increased value in Z.	2
Ans	<pre> int Y; Y = 30; Y = Y + 5; Z = Y; </pre>	
	<i>(1/2 mark for declaring Y) (1/2 mark for initialising Y to 30) (1/2 mark for incrementing the value of Y) (1/2 mark for assigning the final value to Z)</i>	
3	(a) What is MySQL?	1
Ans	MySQL is a Relational Database Management System.	
	<i>(1 mark for correct answer)</i>	

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

		<p>Note: ½ mark to be awarded if only ‘Open Source Software’ is mentioned</p>																
	(b)	<p>Charvi is inserting "Sharma" in the "LastName" column of the "Emp" table but an error is being displayed. Write the correct SQL statement.</p> <pre>INSERT INTO Emp ('Sharma') VALUES (Lastname) ;</pre>	1															
	Ans	<pre>INSERT INTO Emp (Lastname) VALUES ('Sharma') ;</pre>																
		(1 mark for correct answer)																
	(c)	<p>Kunal created the following table with the name ‘Friends’:</p> <table border="1" style="margin-left: 20px; border-collapse: collapse;"> <thead> <tr> <th>FriendCode</th> <th>Name</th> <th>Hobbies</th> </tr> </thead> <tbody> <tr> <td>F101</td> <td>Bijoy</td> <td>Swimming</td> </tr> <tr> <td>F102</td> <td>Abhinav</td> <td>Reading books</td> </tr> <tr> <td>F103</td> <td>Jyotsna</td> <td>Dancing</td> </tr> </tbody> </table> <p>Now, Kunal wants to delete the ‘Hobbies’ column. Write the MySQL statement.</p>	FriendCode	Name	Hobbies	F101	Bijoy	Swimming	F102	Abhinav	Reading books	F103	Jyotsna	Dancing	1			
FriendCode	Name	Hobbies																
F101	Bijoy	Swimming																
F102	Abhinav	Reading books																
F103	Jyotsna	Dancing																
	Ans	<pre>ALTER TABLE Friends DROP Hobbies; OR ALTER TABLE Friends DROP COLUMN Hobbies;</pre>																
		<p>(½ mark for ALTER TABLE) (½ mark for DROP Hobbies) OR (½ mark for just mentioning ALTER TABLE command)</p>																
	(d)	<p>Mrs. Sen entered the following SQL statement to display all Salespersons of the cities "Chennai" and ‘Mumbai’ from the table ‘Sales’.</p> <p>Table :Sales</p> <table border="1" style="margin-left: 20px; border-collapse: collapse;"> <thead> <tr> <th>Scode</th> <th>Name</th> <th>City</th> </tr> </thead> <tbody> <tr> <td>101</td> <td>Aakriti</td> <td>Mumbai</td> </tr> <tr> <td>102</td> <td>Aman</td> <td>Punjab</td> </tr> <tr> <td>103</td> <td>Banit</td> <td>Delhi</td> </tr> <tr> <td>104</td> <td>Fauzia</td> <td>Mumbai</td> </tr> </tbody> </table> <pre>SELECT * FROM Sales WHERE City='Chennai' AND City='Mumbai';</pre> <p>Rewrite the correct statement if wrong or write statement is correct.</p>	Scode	Name	City	101	Aakriti	Mumbai	102	Aman	Punjab	103	Banit	Delhi	104	Fauzia	Mumbai	1
Scode	Name	City																
101	Aakriti	Mumbai																
102	Aman	Punjab																
103	Banit	Delhi																
104	Fauzia	Mumbai																
	Ans	<pre>SELECT * FROM Sales WHERE City='Chennai' OR City='Mumbai'; OR SELECT * FROM Sales WHERE City='Chennai' City='Mumbai'; OR SELECT * FROM Sales WHERE City IN ('Chennai', 'Mumbai');</pre>																

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

		<p><i>(1 mark for correct SQL statement)</i> <i>Note : ½ mark to be allotted if only error is identified.</i></p>											
	(e)	i) Name 2 Aggregate (Group) functions of SQL.	2										
		SUM(), MAX(), MIN(), AVG(), COUNT(), COUNT(*) (Any Two)											
		<p><i>(½ mark each for any 2 Group functions)</i> <i>Note : Function names without parentheses also to be accepted as correct answers.</i></p>											
		<p>ii) Consider the table:</p> <p style="text-align: center;">Table: Company</p> <table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse;"> <thead> <tr> <th>SID</th> <th>SALES</th> </tr> </thead> <tbody> <tr> <td>S101</td> <td>20000</td> </tr> <tr> <td>S103</td> <td>NULL</td> </tr> <tr> <td>S104</td> <td>10000</td> </tr> <tr> <td>S105</td> <td>15000</td> </tr> </tbody> </table> <p>What output will be displayed by the following SQL statement? SELECT AVG(SALES) FROM Company;</p>	SID	SALES	S101	20000	S103	NULL	S104	10000	S105	15000	
SID	SALES												
S101	20000												
S103	NULL												
S104	10000												
S105	15000												
	Ans	15000											
		<i>(1 mark for correct answer)</i>											
	(f)	<p>Given below is the 'Stu' table:</p> <table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse;"> <thead> <tr> <th>RNO</th> <th>NAME</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Amit</td> </tr> <tr> <td>2</td> <td>Bhishm</td> </tr> </tbody> </table> <p>The following Statements are entered: SET AUTOCOMMIT = 0; INSERT INTO Stu VALUES (5, 'Rahul'); COMMIT; UPDATE Stu set name='Rahuliya' where Rno= 5; SAVEPOINT A; INSERT INTO Stu VALUES (6, 'Cristina'); SAVEPOINT B; INSERT into Stu values (7, 'Fauzia'); SAVEPOINT C; ROLLBACK TO B; Now what will be the output of the following statement: SELECT * FROM Stu;</p>	RNO	NAME	1	Amit	2	Bhishm	2				
RNO	NAME												
1	Amit												
2	Bhishm												
	Ans	<table border="1" style="margin-left: auto; margin-right: auto; border-collapse: collapse;"> <thead> <tr> <th>RNO</th> <th>NAME</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Amit</td> </tr> <tr> <td>2</td> <td>Bhishm</td> </tr> <tr> <td>5</td> <td>Rahuliya</td> </tr> <tr> <td>6</td> <td>Cristina</td> </tr> </tbody> </table>	RNO	NAME	1	Amit	2	Bhishm	5	Rahuliya	6	Cristina	
RNO	NAME												
1	Amit												
2	Bhishm												
5	Rahuliya												
6	Cristina												
		<i>(½ mark for each row)</i>											
	(g)	Consider the table 'Hotel' given below.	2										

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

	<p>Table : Hotel</p> <table border="1"> <thead> <tr> <th>EMPID</th> <th>Category</th> <th>Salary</th> </tr> </thead> <tbody> <tr> <td>E101</td> <td>MANAGER</td> <td>60000</td> </tr> <tr> <td>E102</td> <td>EXECUTIVE</td> <td>65000</td> </tr> <tr> <td>E103</td> <td>CLERK</td> <td>40000</td> </tr> <tr> <td>E104</td> <td>MANAGER</td> <td>62000</td> </tr> <tr> <td>E105</td> <td>EXECUTIVE</td> <td>50000</td> </tr> <tr> <td>E106</td> <td>CLERK</td> <td>35000</td> </tr> </tbody> </table> <p>Mr. Vinay wanted to display average salary of each Category. He entered the following SQL statement. Identify error(s) and Rewrite the correct SQL statement.</p> <pre>SELECT Category, Salary FROM Hotel GROUP BY Category;</pre>	EMPID	Category	Salary	E101	MANAGER	60000	E102	EXECUTIVE	65000	E103	CLERK	40000	E104	MANAGER	62000	E105	EXECUTIVE	50000	E106	CLERK	35000	
EMPID	Category	Salary																					
E101	MANAGER	60000																					
E102	EXECUTIVE	65000																					
E103	CLERK	40000																					
E104	MANAGER	62000																					
E105	EXECUTIVE	50000																					
E106	CLERK	35000																					
	<p>Ans</p> <pre>SELECT Category, AVG(Salary) FROM Hotel GROUP BY Category;</pre>																						
	<p><i>(2 marks for correct answer)</i> OR <i>(1 mark for only identifying error)</i></p>																						
4	(a)	When is if-else if statement preferred over switch statement?	1																				
	Ans	<ul style="list-style-type: none"> • When relational operators have to be used • When range checks has to be done • When data types other than int & char have to be used 																					
		<i>(1 mark for any one correct point)</i>																					
	(b)	What is the purpose of break statement?	1																				
	Ans	'break' statement terminates the loop / switch and transfers control to the statement following the loop / switch .																					
		<p><i>(1 mark for correct answer)</i> Note : Full 1 mark to be allotted if "break terminates the loop / switch" is mentioned.</p>																					
	(c)	<p>What will be displayed in jTextField1 and jTextField2 after the following code is executed:</p> <pre>int t; int s; s = 2; t = (4*s++) / 2; jTextField1.setText(" "+t); jTextField2.setText(" "+s);</pre>	1																				
	Ans	4 will be displayed in jTextField1 3 will be displayed in jTextField2																					
		<i>(½ mark for each correct answer)</i>																					

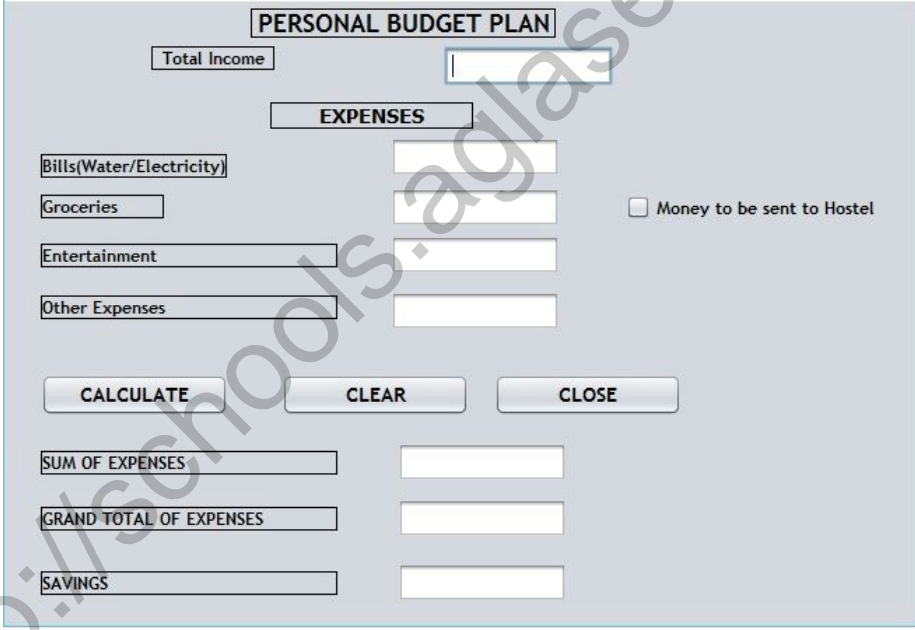

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

	<p>(d) Write the contents of jTextField1, jTextField2, jTextField3 and jTextField4 when the following statements are executed :</p> <pre>String x; String str = "Java"; x = str.concat("study"); double a = 7.8765; jTextField1.setText(x.length()+" "); jTextField2.setText(x.toUpperCase()); jTextField3.setText(x.substring(2,5)); jTextField4.setText(Math.round(7.8765)+" ");</pre>	2
Ans	<pre>jTextField1: 9 jTextField2: JAVASTUDY jTextField3: vas jTextField4: 8 OR 9 JAVASTUDY vas 8</pre>	
	<p><i>(½ mark for each line of output)</i></p>	
	<p>(e) Rewrite the following code using WHILE loop:</p> <pre>int sum = 0; for(int i=9;i>=1;i--) { if(i%3==0) sum = sum + i; else sum = sum - i; }</pre>	2
Ans	<pre>int sum = 0, i= 9; while (i>=1) { if(i%3==0) sum = sum + i; else sum = sum - i; i--; }</pre>	
	<p><i>(½ mark for correct initialisation of i)</i> <i>(½ mark for correct condition)</i> <i>(½ mark for correct loop body)</i> <i>(½ mark for correct updation of i)</i></p>	
	<p>(f) The following code has error(s). Rewrite the correct code underlining all the corrections made :</p> <pre>int x = 10; int y = 50;</pre>	2

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

	<pre>do; { x+5 = x; y-5 = y; while (x <= y);</pre>	
Ans	<pre>int x = 10; int y = 50; do { x= x+5; y = y-5; } while (x <= y);</pre>	
	<p>(½ mark for correcting each error) OR (1 mark for only identifying any four errors)</p>	
(g)	<p>Vijay has developed a software for planning personal budget. A screenshot of the same is shown below:</p>  <p>Total Income, Expenses of Bills (Water/Electricity), Groceries, Entertainment, other expenses and whether money is to be sent to Hostel are entered by the user. Sum of Expenses, Grand Total of Expenses and Savings are calculated and displayed by the program. Write the code to do the following :</p> <p>i. When 'CALCULATE' button is clicked, Sum of Expenses, Total Expenses and Savings should be calculated and displayed in appropriate text fields.</p> <ul style="list-style-type: none"> Sum of Expenses is calculated by adding expenses on Bills(Water/Electricity), Groceries, Entertainment and other expenses. 	3

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

	<ul style="list-style-type: none"> Grand Total of Expenses is calculated according to the following criteria: If 'Money to be sent to Hostel' checkbox is selected, 3000.00 is to be added to the sum of expenses. If it is not selected, Grand Total of Expenses is the same as sum of expenses. Savings = Total Income - Grand Total of Expenses. 	
Ans	<pre>//Calculation of Sum of Expenses jTextField6.setText("" + Integer.parseInt(jTextField2.getText())+ Integer.parseInt(jTextField3.getText())+ Integer.parseInt(jTextField4.getText())+ Integer.parseInt(jTextField5.getText())); //Calculation of Grand Total of Expenses if(jCheckBox1.isSelected()) jTextField7.setText("" + 3000 + Integer.parseInt(jTextField6.getText())); else jTextField7.setText("" + Integer.parseInt(jTextField6.getText())); // Calculation of Savings jTextField8.setText("" + Integer.parseInt(jTextField1.getText()) - Integer.parseInt(jTextField7.getText()));</pre>	
	<p><i>(1 mark for calculating and displaying 'Sum of Expenses')</i> <i>(1 mark for correct use of if ...else statement)</i> <i>(½ mark for calculating and displaying 'Grand Total of expenses')</i> <i>(½ mark for calculating and displaying 'Savings')</i></p>	
(ii)	When 'CLEAR' button is clicked, all text fields and checkbox should be cleared.	1
	<pre>jTextField1.setText(""); jTextField2.setText(""); jTextField3.setText(""); jTextField4.setText(""); jTextField5.setText(""); jTextField6.setText(""); jTextField7.setText(""); jTextField8.setText(""); jCheckBox1.setSelected(false);</pre>	
	<p><i>(½ mark for clearing any text field)</i> <i>(½ mark for clearing check box)</i> Note : NULL in place of "" to be accepted for clearing text field.</p>	
(iii)	When 'CLOSE' button is clicked, the application should close.	1
	<pre>System.exit(0);</pre>	

CBSE AISSEE 2016 Marking Scheme for Informatics Practises

(Sub Code: 065 Paper Code 90/1 Delhi)

		(1 mark for correct answer)																			
5	(a)	<p>Anita has created the following table with the name 'Order'.</p> <p>Table: Order</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="text-align: center;">Column Name</th> <th style="text-align: center;">Constraint</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">OrderId</td> <td style="text-align: center;">Primary Key</td> </tr> <tr> <td style="text-align: center;">OrderDate</td> <td style="text-align: center;">Not Null</td> </tr> <tr> <td style="text-align: center;">OrderAmount</td> <td></td> </tr> <tr> <td style="text-align: center;">StoreId</td> <td></td> </tr> </tbody> </table> <p>One of the rows inserted is as follows :</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th style="text-align: center;">OrderId</th> <th style="text-align: center;">OrderDate</th> <th style="text-align: center;">OrderAmount</th> <th style="text-align: center;">StoreId</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">O101</td> <td style="text-align: center;">2015-02-12</td> <td style="text-align: center;">34000</td> <td style="text-align: center;">S104</td> </tr> </tbody> </table>	Column Name	Constraint	OrderId	Primary Key	OrderDate	Not Null	OrderAmount		StoreId		OrderId	OrderDate	OrderAmount	StoreId	O101	2015-02-12	34000	S104	2

CBSE AISSCE 2016 Marking Scheme for Informatics Practices

(Sub Code: 065 Paper Code 90/1 Delhi)

		Table:Course														
		CourseId	Subject	TeacherId	Fee											
		C101	Introductory Mathematics	T101	4500											
		C103	Physics	T101	5000											
		C104	Introductory Computer Science	T102	4000											
		C105	Advance Computer Science	T104	6500											
(i)	Which column is used to relate the two tables?															
Ans	TeacherId column is used to connect the two tables.															
		<i>(1 mark for correct column name)</i>														
(ii)	Is it possible to have a primary key and a foreign key both in one table? Justify your answer with the help of table given above.															
Ans	Yes. As in the Table:Course, CourseId can be used as Primary key and TeacherId is the foreign key.															
		<i>(½ Mark for correct answer)</i> <i>(½ Mark for correct justification)</i>														
(c)	With reference to the above given tables, write commands in SQL for (i) and (ii) and output for (iii) :					6										
(i)	To display CourseId, TeacherId, Name of Teacher, Phone Number of Teachers living in Delhi.															
Ans	<pre>SELECT CourseId, TeacherId, Name, PhoneNumber FROM Course, Faculty WHERE Course.TeacherId = Faculty.TeacherId AND city = 'Delhi' ;</pre>															
		<i>(1 mark for correct use of SELECT and FROM)</i> <i>(½ mark for each condition using WHERE clause)</i>														
(ii)	To display TeacherID, Names of Teachers, Subjects of all teachers with names of Teachers starting with 'S'.															
Ans	<pre>SELECT TeacherId, Name, Subject FROM Faculty, Course WHERE Faculty.TeacherId = Course. TeacherId AND Name like 'S%';</pre>															
		<i>(1 mark for correct use of SELECT and FROM)</i> <i>(½ mark for each condition)</i>														
(iii)	<pre>SELECT CourseId, Subject, TeacherId, Name, PhoneNumber FROM Faculty, Course WHERE Faculty.TeacherId = Course.TeacherId AND Fee >= 5000;</pre>															
Ans	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>CourseId</th> <th>Subject</th> <th>TeacherID</th> <th>Name</th> <th>PhoneNumber</th> </tr> </thead> <tbody> <tr> <td>C103</td> <td>Physics</td> <td>T101</td> <td>Savita Sharma</td> <td>991019564</td> </tr> </tbody> </table>					CourseId	Subject	TeacherID	Name	PhoneNumber	C103	Physics	T101	Savita Sharma	991019564	
CourseId	Subject	TeacherID	Name	PhoneNumber												
C103	Physics	T101	Savita Sharma	991019564

(Sub Code: 065 Paper Code 90/1 Delhi)

		C105	Advance Computer Science	T104	Simi Arora	658777564												
		(1 mark for each line of correct output)																
7	(a)	“In e-Business, customers should shop only when they trust the e-store provider for payment methods”- Justify the statement					1											
	Ans	In e-business, security about the transaction being made by the customer is of utmost importance. A customer should ensure that information about his/her bank accounts, credit cards should not be available to unauthorized persons/e-stores as account may be hacked or money may get stolen/embezzled.																
		(1 mark for correct justification)																
	(b)	Which of the following statements is NOT true in e-Governance? Rewrite the statement after correcting it. (i) Online applications and tracking of status of applications should be provided. (ii) Citizens should not be required to submit documents in physical form. (iii) On line Forms should be made tricky so that only well educated users can enter data. (iv) Government should interact with citizens and enlighten them about different schemes through social media and web based platforms.					2											
	Ans	(iii) Online Forms should be made so simple that all users can enter data																
		(1 mark for identifying (iii) as answer) (1 mark for writing correct statement) OR (½ mark each for mentioning any one of (i), (ii) or (iv) as True)																
	(c)	Ms. Arora is creating a form for accepting Visa applications. Help her to choose most appropriate controls out of ListBox, ComboBox, TextField, TextArea, RadioButton, CheckBox, Label and Command Button for the following entries.					2											
		<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">S.No.</th> <th style="width: 80%;">Function</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td>To enter EMAIL ID</td> </tr> <tr> <td style="text-align: center;">2</td> <td>To choose GENDER</td> </tr> <tr> <td style="text-align: center;">3</td> <td>To enter NATIONALITY from countries given as options.</td> </tr> <tr> <td style="text-align: center;">4</td> <td>To enter REMARKS in the form of a paragraph about the purpose of visit.</td> </tr> </tbody> </table>						S.No.	Function	1	To enter EMAIL ID	2	To choose GENDER	3	To enter NATIONALITY from countries given as options.	4	To enter REMARKS in the form of a paragraph about the purpose of visit.	
S.No.	Function																	
1	To enter EMAIL ID																	
2	To choose GENDER																	
3	To enter NATIONALITY from countries given as options.																	
4	To enter REMARKS in the form of a paragraph about the purpose of visit.																	
	Ans	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 10%;">S.No.</th> <th style="width: 60%;">Function</th> <th style="width: 30%;">Control</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">1</td> <td>To enter EMAIL ID</td> <td>Text field</td> </tr> <tr> <td style="text-align: center;">2</td> <td>To choose GENDER</td> <td>Radio Button</td> </tr> </tbody> </table>						S.No.	Function	Control	1	To enter EMAIL ID	Text field	2	To choose GENDER	Radio Button		
S.No.	Function	Control																
1	To enter EMAIL ID	Text field																
2	To choose GENDER	Radio Button
