Question from 3 to 6 are based on the following :

Eight friends J, K, L, M, N, O, P and Q live on eight different floors of a building but not necessarily in same order. The lower most floor of the building is numbered one, the above that numbered two and so on until the top most floor is numbered eight.

- J lives on floor numbered six.
 - Only one person lives between and L.
 - O lives on the floor immediately below L.
 - Only one person lives between O and P.
 - O lives above P.
 - K lives on an even numbered floor but not on the floor numbered two.
 - Two persons live between K and Q.
 - Q does not live on the lower most floor.
 - N lives on one of the floor above Q.
3. If P and L interchange their places, who will live between P and M?
(A) O (B) L (C) J (D) No one

4. Which of the following is true about M?
- (A) K lives immediately above M. (B) Only two people live between M and Q.
(C) M lives on an odd numbered floor. (D) M lives on the lower most floor.
5. Who amongst the following lives on the floor number eight ?
- (A) P (B) O (C) K (D) Cannot be determined
6. Three of the following four are alike in a certain way based on the given arrangement and thus form a group. Which of the following does not belong to the group ?

General English

Question 101 to 104 are based on the following :

While cement is the basic raw material for producing cement tiles and cement paint which are used extensively in building construction. The main consumers of white cement are, therefore, cement tile and cement paint manufacturing units. These consumers, mostly in the small scale sector, are today facing a major crisis because of a significant increase in the price of white cement during a short period. The present annual licensed production capacity of white and grey cement in a country is approximately 3.5 lakh tones. The average demand is 2-2.5 lakh tones. This means that there is idle capacity to the tune of one lakh tones or more, The price is, therefore, not a phenomenon arising out of inadequate production capacity but evidently because of artificial scarcity created by the manufactures in their self-interest.

The main reason for the continuing spurt in cement price is its decontrol. As it is, there is stiff competition in the cement paint and tile manufacturing business. Any further price revision at this stage is bound to have a severe adverse impact on the market conditions. The Government should take adequate steps to ensure that suitable controls are brought in. Else it should allow import of cement.

101. Which of the following words has the opposite meaning as the word "basic" as used in the passage?
- (A) Vital (B) Unimportant (C) Acidic (D) Last
102. Why is the price of cement going up ?
- (A) Because the Government is controlling quota
 (B) Because of export of white cement
 (C) Because of the large usage of white cement
 (D) None of the above

103. What is the crisis faced by the cement tile manufactures as described in the passage ?

- (A) White cement prices as very high (B) White cement is not of good quality
(C) White cement usage is high (D) White cement is priced very low

104. Which of the following words has the same meaning as the word 'artificial' as used in the passage?

- (A) Deliberate (B) Prolonged (C) Practical (D) Unnatural
