	PART B OPTION 2 (Computerised Accounting)																										
23	Attributes of information to be stored in Payroll data base: (Any two) (i) Name (ii) ID (iii) Designation (iv) Location (v) Basic Pay		[½] [½]																								
24	Answer :- c) Generation of reports and information in fixed format		[1]																								
25	a); c); b)		[1]																								
26	Ans :- a) – ii; b) - i); c) – iii)		[1]																								
27	The activity sequence of the basic information mode is collect data, organize and process it and Then communicate the information extracted.		[1]																								
28	Cost of installation and maintenance is generally low with Generic Software and is relatively high with Specific software		[1]																								
29	Ans :- d)		[1]																								
30	<p>The Adjusting entry is recorded to relate the figures to the trading period. Suppose, premises have been sublet on March 31, and three months' rent, has been received in advance amounting to Rs. 12000. While preparing accounts up to 31st March, one should take into account only one month's rent for preparing the profit and loss account (accounting period concept); the rest two month's rent, already received is for the next year and will be credited to profit and loss account next year. The adjusting entry will be:</p> <p style="text-align: center;">Rent Account Dr To Advance Rent Account</p> <p>Rent Received in advance Account is a 'Liability' and is shown in the balance sheet.</p> <p style="text-align: center;">Or</p> <p>Transparency and control CAS provides sufficient time to plan, increases data accessibility and enhances user satisfaction. With computerised accounting, the organisation will have greater transparency for day to day business operations and access to the vital information.</p> <p>Scalability CAS enables in changing the volume of data processing in tune with the change in the size of the business. The software can be used for any size the business and type of the organisation.</p>		[3] [3]																								

31	<p>PMT :- The PMT function calculates the periodic payment for an annuity assuming equal payments and a constant rate of interest. The syntax of PMT function is as follows: = PMT (rate, nper, pv, [fv], [type])</p> <p>where Rate is the interest rate per period, Nper is the number of periods, Pv is the present value or the amount the future payments are worth presently, future value or cash balance that after the last payment is made (a future value of zero when we omit this optional argument)</p> <p>Type is the value 0 for payments made at the end of the period or the value 1 for payments made at the beginning of the period. The PMT function is often used to calculate the payment for mortgage loans that have a fixed rate of interest</p>	[4]
32	<p>A format change, such as background cell shading or font colour that is applied to a cell when a specified condition for the data in the cell is true. Conditional formatting is often applied to worksheets to find:</p> <ol style="list-style-type: none"> a. Data that is above or below a certain value. Duplicate data values. b. Cells containing specific text. Data that is above or below average. c. Data that falls in the top ten or bottom ten values. <p>Benefits of using conditional formatting:</p> <ol style="list-style-type: none"> i) Helps in answering questions which are important for taking decisions. ii) Guides with help of using visuals. iii) Helps in understanding distribution and variation of critical data. 	[6]
