Assignment

1. Today there are many applications for Desktop Publishing. Which one is an open source software that is very helpful for creating scientific articles and research reports.

Ans) LaTeX

2. From which menu do we get 'Table of contents and Index'?

Ans) Table of Contents and Index

3. When we move cursor to one of the headings in the table of contents that we have created, what message appears?

Ans) The message tells us that if we click at any line on the contents page with the ctrl key pressed, the link gets activated and takes us to the corresponding page.
