

ASSIGNMENT

Write an essay on the Challenges of Disaster Management in India.

Disaster Management Essay: Every country should have a plan and an outlay to maintain or mitigate the cause of disasters, both man-made and natural. Disaster management is a term that is usually referred to as the management of resources and responsibilities in dealing with the losses of life and property in a disaster like an earthquake, volcanic eruptions, epidemics and pandemics. The whole world is in the disaster management mode due to the COVID-19 pandemic that has gripped the whole world from the past few months. But this essay on disaster management is not confined to that aspect.

Countries that were disaster-ready are coping up with the pandemic relatively well than the countries that had neglected the importance of disaster management.
