

SSLC-CHEMISTRY

Readiness Class-02

1. Among the following, identify the electronic configuration of Noble gas ?

[ (2,8,7) (2,8,8) (2,8,2) ]

2. Which atom loses electron during the formation of Sodium Chloride ?

3. Compounds formed by the combination of charged ions are known as Ionic compounds. Give one example

4. What is meant by  $Mg^{2+}$  ion ?

5. The combining capacity of an element is called Valency. Fill the table given below .

Element	Valency
Nitrogen (N)	
Oxygen (O)	
Flurine (F)	
Calcium (Ca)	
Chlorine (Cl)	

\*\*\*\*\*
