Mrs. Krishnan didn't bother to hide her sarcasm, and continued, 'Considering that the boomerang sliced through all the TV aerials in the neighbourhood, caused permanent damage to several cars in the parking lot, and knocked out our watchman cold, with the force you threw it.' 'But Zigzag is different. Somu says we are sure to love Zigzag,' soothed Dr. Krishnan, 'because the bird can talk and sing in about twenty-one different language – mostly African languages, of course. When it sings, it moves the listeners to tears. 'This is Zigzag! Announced Visu with a flourish. 'His full name is Ziggy-Zagga-King-of-the-Tonga. How I'm going to miss him! So beautifully he talks! He can even recite French Poetry!'

**Questions:**

Occasional self-medication has always been a part of normal living. The making and selling of drugs has a long history and is closely linked, like medical practice itself, with belief in magic. Only during the last hundred years or so has the development of scientific techniques made diagnosis possible. The doctor is now able to follow up the correct diagnosis of many illnesses with specific treatment of their cause. In many other illnesses of which the causes remain unknown, he is still limited, like the unqualified prescriber, to the treatment of symptoms. The doctor is trained to decide when to treat symptoms only and when to attack the cause. This is the essential difference between medical prescribing and self-medication.

**47. (i) Read the following passage and answer the questions given below :**

A sanctuary may be defined as a place where Man is passive and the rest of Nature is active Till quite recently, Nature had her own sanctuaries, where man either did not go at all or only as a tool-using animal in comparatively small numbers. But now, in this machinery age, there is no place left where man cannot go with overwhelming forces at his command. He can strangle to death all the nobler wild life in the world today. Tomorrow he certainly will have done so, unless he exercises due foresight and self-control in the meantime.

There is not the slightest doubt that birds and mammals are now being killed off much faster than they can breed. And it is always the largest and noblest forms of life that suffer most. The whales and elephants, lions and eagles, go. The rats and flies, and all mean parasites, remain. This is inevitable in certain cases. But it is wanton killing off that I am speaking of to-night. Civilized man begins by destroying the very forms of wild life he learns to appreciate most when he becomes still more civilized. The obvious remedy is to begin conservation at an earlier stage, when it is easier and better in every way, by enforcing laws for close seasons, game preserves, the selective protection of certain species, and sanctuaries.

**Questions**

- a) What is a sanctuary?
- b) Why do you think man is dominant in machinery age?
- c) Do you think that birds and mammals are reduced nowadays? Why?
- d) How can we prevent the birds and mammals?

**(OR)**

**ii) Read the following poem and answer the questions given below:**

*Woodman, that tree!  
Touch not a single bough  
In youth, it sheltered me,  
And I'll protect it now.  
'T was my forefather's hand  
That placed it near his cot;  
There, woodman, let it stand,  
Thy axe shall harm it not!  
When but an idle boy  
I sought its grateful shade;  
In all their gushing joy  
Here, too, my sisters played.*

*My mother kissed me here,  
My father pressed my hand  
Forgive this foolish tear,  
But let that oak stand!  
My heartstrings round thee cling  
Close as thy bark, old friend!  
Here shall the wild birds sing,  
And still, thy branches bend.  
Old tree! The storm still brave!  
And woodman leave the spot;  
While I have a hand to save,  
Thy axe shall harm it not*

**- George Pope Morris**

**Questions**

- a) Why does the poet want the woodman to spare the trees?
- b) Who planted the trees?
- c) What was the poet's favourite time pass?
- d) How can we save trees?
