- Who was the 2nd Leader ?
 - Who was the queen among them ?
 - When did Ganapathi Deva rule ?
 - Who was the last ruler ?
7. Read the given below paragraphs under the title 'Agriculture and Irrigation' and comment on them.

Agriculture and Irrigation

Many of the achievements of the Cholas were made possible through new developments in agriculture. Forests had to be cleared in some regions ; land had to be levelled in other areas. In the delta region embankments had to be built to prevent flooding and canals had to be constructed to carry water to the fields.

In many cases, it was necessary to water crops artificially. In some areas wells were dug. In other places, huge tanks were constructed to collect rain water.

- Floods are beneficial to agricultural fields. Can you find out how floods help ?
- How were tanks built ?

Section - III

Note : 1. Answer all the questions.

2. There is internal choice of each question.

3. Each question carries 8 Marks.

$4 \times 8 = 32$

10. Describe the main stages of the water cycle.

(OR)

What were the activities associated with Chola temples.

11. Read the following para and answer the questions.

Contour lines

A contour is a line joining the places with equal heights. On the map of Nimpur you would have seen that there is a line passing through the village, this is the 50 meter contour line. All places on this line will have the same heights of 50 meters. Contour lines will be in irregular shape depending upon the land form. These cannot cut with other. The distance between two contour lines will depend upon the landscape. If the land has a steep climb then the contour lines will be near to each other.

- i) What is a contour ?
- ii) What is contour line on the map of Nimpur ?
- iii) What is the shape of contour lines ?
- iv) What is the other name of the contour line ?

(OR)
