(Any 3 points)</li> </ul>	1+1+1	3
14	a. Ancient towns - Varanasi Prayag (Allahabad), Pataliputra (Patna), Madurai etc b. Medieval towns - Delhi, Hyderabad, Jaipur etc c. Modern towns - Mumbai, Chennai, Kolkata etc <b>To write the classification</b> <b>To write one example each</b>	$\frac{1}{2} \times 3 = \frac{1}{2}$ $\frac{1}{2} \times 3 = \frac{1}{2}$	3
15	Any three measures like afforestation, water shed management, shelter belt plantation, land development, sustainable economic activities etc	1+1+1	3
16	Griffith Taylor It reflects a middle path between the two ideas of environmental determinism and possibilism. It is also known as stop and go determinism. The concept shows that neither is there a situation of absolute necessity (environmental determinism) nor is there a condition of absolute freedom (possibilism). It means that human beings can conquer nature by obeying it. They have to respond to the red signals and can proceed in their	1	

			_
	pursuits of development when nature permits the		3
	modifications. It means that possibilities can be created		
	within the limits which do not damage the environment		
	and there is no free run without accidents. The free run		
	which the developed economies attempted to take has		
	already resulted in the green house effect, ozone layer		
	depletion, global warming, receding glaciers and		
	degrading lands.		
	(Any 2 points)	2	
17	Transport distance can be measured as:		
	Km distance : actual distance of route length	1	
	-	-	
	Time distance : the time taken to travel on a particular		
	route	1	3
	Cost distance : the expense of travelling on a route		
		1	
18	• The rural settlements derive their life support or		
	basic economic needs from land based primary		
	economic activities, whereas, urban settlements,	1	
		1	
	depend on processing of raw materials and		
	manufacturing of finished goods on the one hand		
	and a variety of services on the other.		
	Cities act as nodes of economic growth, provide		
	goods and services not only to urban dwellers but		
	also to the people of the rural settlements in their	1	3
	hinterlands in return for food and raw materials	-	
	Rural and urban settlements differ in terms of social		
	relationship, attitude and outlook. Rural people are		
	less mobile and therefore, social relations among	1	
	them are intimate. In urban areas, on the other		
	hand, way of life is complex and fast, and social		
	relations are formal.		
19	This links North-eastern U.S.A. and Northwestern		
19			
	Europe, the two industrially developed regions of the		
	world. The foreign trade over this route is greater than		
	that of the rest of the world combined. One fourth of the		
	world's foreign trade moves on this route. It is,		
	therefore, the busiest in the world and otherwise, called	1+1+1	3
	the Big Trunk Route. Both the coasts have highly		
	advanced ports and harbour facilities.		
	(Any 3 points)		
20	Also known as open-cast mining		
	• the easiest and the cheapest way of mining minerals		
	that occur close to the surface.		
	• Overhead costs such as safety precautions and	1+1+1	3
	equipment is relatively low in this method.		-
	The output is both large and rapid.		
ĺ	(Any 3 points)		

21	The main roads which are constructed and maintained by the Central Government are known as the National Highways. These roads are meant for inter-state transport and movement of defence men and material in strategic areas. These also connect the state capitals, major cities, important ports, railway junctions, etc. The National Highways Authority of India (NHAI)is entrusted with the responsibility of development, maintenance and operation of National Highways.	1+1+1+1	4
22	<ul> <li>a. Equity b. Sustainability c. Productivity</li> <li>d. Empowerment</li> <li>Equity refers to making equal access to opportunities available to everybody. The opportunities available to people must be equal irrespective of their gender, race, income and in the Indian case, caste.</li> <li>Sustainability means continuity in the availability of opportunities. To have sustainable human development, each generation must have the same opportunities. Misuse of any of these resources will lead to fewer opportunities for future generations.</li> <li>Productivity here means human labour productivity or productivity in terms of human work. Such productivity must be constantly enriched by building capabilities in people.</li> <li>Empowerment means to have the power to make choices. Such power comes from increasing freedom and capability.</li> </ul>	1/2×4=2	4
	To explain about any one (Any 2 points)	1+1	
23	Phase III : The decades 1951-1981 are referred to as the period of population explosion in India, which was caused by a rapid fall in the mortality rate but a high fertility rate of population in the country. The average annual growth rate was as high as 2.2 per cent. It is in this period, after the Independence, that developmental activities were introduced through a centralised planning process and economy started showing up ensuring the improvement of living condition of people at large. Consequently, there was a high natural increase and higher growth rate. Besides, increased international migration bringing in Tibetans, Bangladeshis, Nepalies and even people from Pakistan contributed to the high growth rate.	2	

	Phase IV : In the post 1981 till present, the growth rate of country's population though remained high, has started slowing down gradually. A downward trend of crude birth rate is held responsible for such a population growth. This was, in turn, affected by an increase in the mean age at marriage, improved quality of life	2	4
	particularly education of females in the country.		
24	The factors include access to market, raw material, labour supply, sources of energy, transport and communication, government policy and access to agglomeration economies.		
	To describe any four ( 2 points each)	1+1+1+1	4
25	The problems of Indian agriculture are Dependence on monsoon, low productivity,Constraints of Financial Resources and Indebtedness, Lack of Land Reforms, Small Farm Size and Fragmentation of Landholdings, Lack of Commercialisation, Vast Underemployment and Degradation of Cultivable Land		
	To identify any four problems To describe any one (Any 2 points)	<sup>1</sup> ⁄ <sub>2</sub> ×4 =2 1+1	4
26	a. Availability of water b. Landforms c. Climate d. Soils To mention the factors <b>To explain about any one (Any 2 points)</b>	<sup>1</sup> ⁄ <sub>2</sub> ×4 =2 1+1	4
