permission.

- (iii) When they heard of the Non-Cooperation Movement they defied the authorities, left plantation and headed home.
- (iv) They, however, never reached their destination. Stranded on the way by a railway and steamer strike, they were caught by the police and brutally beaten up.
- (v) The visions of these movements were not defined by the Congress Programme. They interpreted the term Swaraj in their own ways, imagining it to be a time when all suffering and all troubles would be over.
- (vi) Yet, when the tribals chanted Gandhiji's name and raised slogans demanding 'Swatantra Bharat', they were also emotionally relating to an all-India agitation.
- (vii) When they acted in the name of Mahatma Gandhi, or linked their movement to that of the Congress, they were identifying with a movement which went beyond the limits of their immediate locality.

31. **(a) How can the industrial pollution of fresh water be reduced ? Explain with examples.**

5×1=5

- (i) Minimising use of water for processing by reusing and recycling it in two or more successive stages.
- (ii) Harvesting of rainwater to meet water requirements
- (iii) Treating hot water and effluents before releasing them in rivers and ponds.

Treatment of industrial effluents can be done in three phases-

- (a) Primary treatment by mechanical means. This involves screening, grinding, flocculation and sedimentation.
- (b) Secondary treatment by biological process.
- (c) Tertiary treatment by biological, chemical, and physical processes. This involves recycling of wastewater.
- (iv) Overdrawing of groundwater reserves by industry where there is a threat to groundwater resources also needs to be regulated legally.
- (v) Particulate matter in the air can be reduced by fitting smoke stacks to factories with electrostatic precipitators, fabric filters, scrubbers, and inertial separators. Smoke can be reduced by using oil or gas instead of coal in factories.

- (vi) Machinery and equipment can be used and generators should be fitted with silencers.
- (vii) Almost all machinery can be redesigned to increase energy efficiency and reduce noise. Noise absorbing material may be used apart from personal use of earplugs and earphones. The challenge of sustainable development requires integration of economic development with environmental concerns.
