37. A) Air Pollution

**Introduction :**

Air pollution is a big problem that affects the air we breathe. It happens when harmful substances get into the air and make it dirty. Air pollution can make people sick and harm plants and animals too.

**Causes for Air Pollution:**

- Big factories and industries release smoke and harmful gases into the air, polluting it.
- When we drive cars or ride in buses, they release smoke and gases that make the air dirty.
- When we burn coal, oil, or gas for energy, it releases harmful gases into the air, causing pollution.

**Remedies for Air Pollution:**

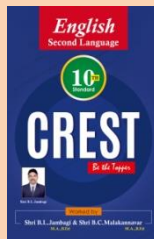

- Trees are like nature's filters. They absorb harmful gases and release oxygen, making the air cleaner. So, let's plant more trees!
- When we save electricity at home by turning off lights and using energy-efficient appliances, we reduce the need for burning fossil fuels, which helps in reducing air pollution.
- Instead of always using cars, we can walk, ride a bike, or share rides with others. This means fewer cars on the road, less pollution!

**Conclusion:**

Air pollution is a serious problem that affects our health and the environment. We can all do our part to help reduce air pollution. Let's work together to breathe clean and fresh air for a healthier and greener world.
