General instructions:

- (i) All the questions are compulsory. Attempt all the sections.**
- (ii) You may attempt any section at a time.**
- (iii) All the questions of a particular section should be attempted in the correct order.**

SECTION A: READING [5 Marks]

Q.1 Answer the following questions after reading the passage.

Cardamom, the queen of all spices, has a history as old as the human race. It is the dried fruit of a herbaceous perennial plant. Warm humid climate, loamy soil rich in organic matter, distributed rainfall and special cultivation and processing methods all combine to make Indian cardamom truly unique in aroma, flavour, size and it has a parrot green colour.

Two types of cardamom are produced in India. The first type is the large one, which has not much significance as it is not traded in the future market. It is cultivated in north-eastern area of the country. The second type is produced in the southern states and these are traded in the future market. These are mainly cultivated in Kerala, Tamilnadu and Karnataka. As per the future market rules, only 7 mm quality was previously traded in exchanges. But later, it relaxed its norms and now 6 mm quality is also traded in the exchanges.

Cardamom is an expensive spice, secondly to saffron. Indian cardamom is known in two main varieties : Malabar cardamon and Mysore cardamom. The Mysore variety contains leaves of cineol, limonene and hence is more aromatic. India is the world's largest producer and exporter and emerged as the leading producer and exporter of cardamom.

The main harvest season of cardamom in India is between August-February. Cardamom reaches the yielding stage two years after the plantation. The primary physical markets of cardamom are Kumily Vandenmodu, Jhekkady, Puliyarmala in Kerala and Bodynaikkaur and Cumbum in Tamilnadu.

Kerala is the main producer of cardamom and contributes upto 60% in total production. Karnataka produces around 25% of the total production of cardamom. Ooty is the main producer of cardamom in Tamilnadu and contributes around 10-15% of the total production. Besides India, Guatemala also produces around 1,000-2,000 ton cardamom per year. Due to low quality of cardamom from Guatemala, it remains available at cheaper rates.

Questions: Based on your understanding of the passage, answer any eight out of ten questions by choosing the correct option.

1. Mysore variety contains leaves of :
 - (a) Limonene
 - (b) Cineol
 - (c) Both (a) and (b)
 - (d) None of these
2. Indian Cardamom is:
 - (a) Poor in quality
 - (b) Average in quality
 - (c) Better in quality
 - (d) None of these
3. Guatemala produces cardamom :
 - (a) More but poor in quality
 - (b) Less but good in quality
 - (c) More and good in quality
 - (d) Less and poor in quality
4. Main harvest season of cardamom in India is :
 - (a) August-February
 - (b) August-March
 - (c) November
 - (d) February-April
5. Cardamom reaches at its yielding stage in :
 - (a) Immediately after plantation
 - (b) Depends upon the plantation
 - (c) One year after plantation

(d) Two years after plantation

SECTION B: WRITING AND GRAMMAR : 13 MARKS

Q.2) Write an application to your school for three days leave to attend marriage ceremony of your elder sister
[5 Marks]

Or

Junk food has no or very little nutritional value and irrespective of the way it is marketed, they are not healthy to consume. Most of the food items labelled as junk food are high in saturated fats and sugar components and also excess of salts and lack any fiber. The only reason for their gaining popularity and increased consumption is that they are ready to eat or easy to cook. In the light of the above statement, write a short paragraph describing the ill effects of junk foods.
