

- 1.The following passes to the deep flexor retinaculum
ANS:Median nerve.
- 2.The average blood loss in normal delivery
ANS:500ml.
- 3.All of the following passes thro posterior cord of branchial plexus except,
A.Thoracodorsal nerve
B.Subscapular nerve
C.Suprascapular nerve
D.Axillary nerve.
ANS:Suprascapular nerve.
- 4.Locking muscles of leg
ANS:Quadriceps femoris.
- 5.Arborescent burns are seen in
ANS:Electrocution.
- 6.Bilateral involvement of Ca of breast
ANS:Lobular carcinoma
- 7.Pellagra is the deficiency of
ANS:Niacin
- 8.Erythroblastalis foetalis is which type of hypersensitivity
ANS:Type 2.
- 9.Ph of vagina in pregnancy
ANS:4- 4.5{KINDLY REFER}
- 10.The causative agent for malignant otitis externa
ANS:Pseudomonas
- 11.Frequent suicidal tendencies are seen in
ANS:Borderline personality disorder.kindly refer
- 12.Substance used in medical adrenalectomy
ANS:Metirapone,[also mitotane is used].
- 13.Auer rod cells are typically seen in
ANS:AML Type M3.
- 14.Lisch nodules are seen in
ANS:Neurofibromatosis.
- 15.The nerve involved in exposure keratopathy
ANS?
- 16.Hellers myotomy is done in
ANS:Achalasia cardia
- 17.The main complication of Trans Urethral Resection of Prostate[TURP]
ANS:Water intoxication.
- 18.The term felon means
ANS:Distal terminal of pulp space of infection.
- 19.Osmotic fragility is increased in
ANS;Hereditary spherocytosis.
- 20.All of the following are true regarding Sumatriptan except
A.99% Bioavailability
B.Contraindicated in coronary artery disease
C.Dilates cranial vessels
D.?
ANS:Metylene glycol.
- 21.Anion gap is increased in all except
A.Ethylene glycol
B.Methylene glycol
C.Diabetic ketoacidosis
D.Starvation.
ANS:Metylene glycol.
- 22.Ligature mark is situated?
- 23.A 3 year old child can perform all except
A.Hop up
B.Skip
C.Story telling
D.Rides a bicycle
- 24.Oxygen will not improve cyanosis in
ANS:Tetralogy of fallot.
- 25.Most common cause of infective endocarditis

- ANS:Streptococcus viridans
- 26.DOC for Ventricular tachycardi
ANS:Lidocaine[also cardioversion]
- 27.The following drug cause peripheral neuropathy
ANS:Vincristine
- 28.The following drug has a side effect of micro corneal deposits in the eye
ANS:Amiodarone
- 29.The following is true about Pilonidal sinus
A.Seen in women
B.Present in anal region.
C?
D?
- 30.An example of enrichment media
A.Selenite
B.Alkaline peptone water
C.Tellurite
ANS:Selenite
- 31.Sclerotic bodies are seen in
ANS:Chromoblastomycosis
32. Sources of nitrogen in urea cycle are Ammonia and
ANS:Aspartate.
- 33.M.avium intracellulare is a
A.Photochromogens
B.Non photochromogens
C.Scotochromogens
ANS:Non photochromogens
- 34.Inquest of Dowry death done by
ANS:Magistrate.
- 35.Primary health centre has how many population in general areas
ANS:30000
- 36.Most common cause of post partum hemorrhage
ANS:Uterine atony
- 37.The following exhibits the diagnosis of psoriasis
ANS:Acanthosis,epidermopoiesis,elongation of rete ridges
- 38.Christmas tree pattern of lesion seen in
ANS:Pityriasis Rosea
- 39.Wickham's striae is seen in
ANS:Lichen planus.
- 40.The following is seen in chediak higashi disease
ANS:Defective phagocytosis
- 41.Auto antibody associated with acetylcholine receptors
ANS:Myasthenia gravis
- 42.Sibutramine is a
ANS:Antiobesity drug
- 43.Austin flint murmur is a
ANS:Mid diastolic murmur
- 44.The general condition for the splenic rupture is good in
ANS:Young patients
- 45.Oschner-Sherren regimen is used in
ANS:Appendicular mass
- 46.Diagnostic procedure for bronchiectasis is
ANS:CT scan.
- 47.Which of the following disease has international vaccine for travellers:
ANS:Yellow fever.
- 48.Enlargement of salivary glands and dry eyes are seen in
ANS:Mikulicz disease
- 49.Techneций scan is used for
ANS:BONES
- 50.All are seen in rickets except
A.Frenkel's line
B.Rosary
C.Frontal bossing

D.Delayed closure of fontanelle

51.Ubiquitin is

ANS:Protein targeted for destructions

52.All are seen in human development index except

ANS:Life expectancy at age 1

53.All are the goals for National health policy 2002 except

ANS:?

54.A pregnant woman delivered a baby at 38 weeks,the infant now suffers from rhinitis,diagnosis is

A.Congenital syphilis

B.Congenital rubella

C.HIV

ANS:Congenital syphilis

55.Antidote for organophosphates poisoning are all except

A.Atropine

B.Pralidoxime

C.Activated charcoal

D.Naloxone

ANS:D.Naloxone

56.Which of the following is a qualitative data

A.Histogram

B.Pictogram

C.Pie chart

D.Scatter diagram

ANS:Pie chart

57.All are true regarding tumor lysis syndrome except[Repeated question,previously asked in mci march 2009]

A.Hyperkalemia

B.Hyperuricemia

C.Hyperphosphatemia

D.Hypercalcemia

ANS:Hypercalcemia

58.Myositis ossificans is derived from

A.Epiphyseal metaplasia

B.Diaphysial metaplasia

ANS?

59.Molluscum contagiosum is a

A.Bacteria

B.Virus

C.Prion

ANS:Virus

60.In lumbar sympathectomy which are removed

A.L1,L2

B.L2,L3

C.L2,L3,L4

D.L1,L2,L3,L4

ANS:L2,L3,L4

61.Richter's hernia

A.Portion of the circumference

62.Which of the following is false regarding 2nd degree burns

ANS:Painless

63.All are radioopaque stones except

A.Calcium

B.Uric acid

C.Struvite

ANS:Uric acid stones

64.All are the infections causing agents after post splenectomy except

A.Ecoli

B.H.influenza

C.Streptococcus

D.Klebsiella

ANS:Klebsiella

65.In modified pattey mastectomy which structure is preserved

ANS:Pectoralis major

66.Prion is a

ANS:Proteineceuos infected particle

67.Cornea gets nourishment from

A.Aqueous humor

B.Vitreous humor

C.Atmosphere

ANS:Atmosphere

68.The term ANKYLOBLEPHARON means

ANS:?

69.The cause of blindness in a young diabetic female is

A.Vitreous hemorrhage

B.Retinal degeneration

ANS?

70.Most common eyelid tumour is

A.Melanoma

B.Retinoblastoma

C.Neuoblastoma

D.Basal cell ca

ANS .Basal cell ca

71.All are true regarding retinitis pigmentosa except

A.Ring scotoma

B.Central scotoma

ANS:Central scotoma

72.All of the following childhood tumours cause proptosis except

A.Retinoblastoma

B.Neuoblastoma

C.Germ cell tumour

D.Leukemia

73.The only drug that should not administred to glaucoma patients is

A.Timolol

B.Phenylephrine

C.Atropine

ANS:Atropine

74.Calorie test based on thermal stimulation of which part of the semi circular canals

A.Lateral

B.Posterior

C.Anterior

ANS:Lateral

75.Caldwell luc operation is done for

A.Antrochanal polyp

B.Recurrent polyp

76.Knucele blender splint is done for

A.Ulnar nerve palsy

B.Radial nerve palsy

C.Median nerve palsy

D.Axillary nerve palsy

77.Serum alkaline phosphate is normal in

A.Osteosarcoma

B.Osteomalacia

C.Multiple myeloma

ANS:C Multiple myeloma

78.Mousy odour urine is present in

A.Maple syrup urine disease

B.Alkaptonuria

C.Phenylketonuria

79.Uveitis is more common in

A.Pauciarticular

B.Polyarticular

C.Systemic disease

80.In Duchennes muscular dystrophy calf muscle is

ANS:Pseudohypertrophy

81.MMR is a

A.Killed vaccine

B.Live attenuated vaccine

82.The test used for pasteurisation of milk is

Ans:Phosphatase test

83.Anti tobacco day is on

ANS:31ST May

84.True about Minimum development goals

Ans:Targets to be achieved by 2015

85.True about ligature mark

ANS?

86.Arborescent burns are seen in

A.Electrocution

B.Lightening

ANS:B Lightening

87.True about postmortem wounds

ANS?

88.Traveller's diarrhoea

A.EPEC

B.ETEC

C.EHEC

D.EIEC

ANS:B.ETEC

89.Mechanism of diarrhea in cholera

A.Increase in c-AMP

B.Increase in c-GMP

C.Inhibit Na^+K^+ ATPase

ANS:A.

90.Most common cause of gas gangrene

ANS:Clostridium perfringes

91.True about coeliac sprue

ANS?

92.Maximum absorption of water is in

A.PCT

B.DCT

C.Collecting duct

ANS:A,PCT

93.Hassal's corpuscle is seen in

ANS:Thymus

94.Muscles involved in respiration

A.Diaphragm

B.Diaphragm and External intercostal

C.Rectus abdominis

ANS?

95.All veins of the following don't have valves except

A.SVC

B.IVC

C.Hepatic

D.Cranial

ANS

96.Which joints resist hyperextension of hip

ANS:Iliofemoral joint

97.Serum marker for Alcoholic liver disease

A.GGT

B.SGPT

C.SGOT

ANS:B

98.Dark field microscopy is used as a diagnostic method for

ANS:Spirochetes

99 . True about HEAT EXHAUSTION

ANS?

100.Which is called tiger mosquito?

ANS:Aedes

101.How many colours used in TRIAGE?

ANS:4

102.Which one of the following is quantitative data

A.Histogram

B.Bar

C.Pie chart

D.Pictogram

103.Who are all persons present in subcentre?

ANS?

104.A health guide works at

A.Each village level

B.Sub centre

C.PHC level

ANS:A

105.Half life of albumin is

A.8 DAYS

B.10 DAYS

C.21 DAYS

ANS:C

106.Best induction anaesthetic agent is

ANS:Thiopentone

107.A child of age 9 needed prophylaxis of vitamin A

A.100000IU IM

B.100000IU ORAL

C.200000IU IM

D.200000IU ORAL

ANS?

108.Breast feeding should be initiated with in

A.1 HR

B.2HR

C.HALF AN HOUR

ANS:C

109.Tuning fork frequency used for testing

A.512 HZ

B.1048HZ

C.248HZ

ANS.A
