Below is given a passage following by several possible inferences which can be drawn from the facts stated in the passage. You have to examine each inference separately in the context of the passage an decide upon its degree of truth or falsity.
Mark answer a) if the inference is 'definitely true', i.e. it properly follows from the statement of facts given.
Mark answer b) if the inference is 'probably true' though not 'definitely true' in the light of the facts given.
Mark answer c) if the 'data are inadequate', i.e. from the facts given you cannot say whether the inference is likely to be true or false.
Mark answer d) if the inference is 'probably false', though not 'definitely false' in the light of the facts given.
Mark answer e) if the inference is 'definitely false', ie it cannot possibly be drawn from the facts given or it contradicts the given facts.

The latest data to show that the overall power situation has got worse, with the ratio for peak- load shortages now the highest in a decade. In absolute terms, the power deficit has hit record levels and seems almost certain to further deteriorate without real reforms on the ground. Even as aggressive technical and commercial losses in the power system remain much high at over a third of total generation, pan-India capacity addition is now well below target. A short age of equipment and skills is blamed for the marked slow-down in augmenting power capacity. But the dearth of resources can only be relative. In fact, the real bane of the sector is continuing revenue leakage in the state power utilities and unacceptably high aggregate technical and commercial losses, much of it plain theft of electricity.Given the preponderance of state utilities in power supply, the fact that they remain very much in red does affect investor comfort and return funds flow.

Q.36. Indian power generation is commonly controlled by private sector.

**Q.37.** Reform in power sector in India has yet not attained its desired level.

Q.38. Indian power sector is yet to attain status comparable to developed countries.

Q.39. Power theft is one major component of revenue losses in power sector.

Q.40. Aggregate technical and commercial loss is much less than thirty per cent of the total power generation.

TEST - IV
ENGLISH LANGUAGE
Read the following passage carefully and answer the questions given below it. Certain words have been printed in bold to help you locate them while answering some of the questions.

Political **ploys** initially hailed as masterstrokes often end up as flops. The Rs. 60000-crore farm loanwaiver announced in the budget writes off 100% of overdues of small and marginal farmers holding upto two hectares, and 25% of over dues of larger farmers. While India has enjoyed 8%-9% GDP growth for the past few years, the boom has bypassed many rural areas and farmer distress and suicides have made newspaper headlines. Various attempts to provide relief (employment guarantee scheme, public distribution system) have had little impact, thanks to huge leakages from the government's lousy delivery systems. So, many economists think the loan waiver is a worthwhile alternative to provide relief.

However, the poorest rural folk are landless laborers. who get neither farm loans nor waivers.Halfof small and marginal farmers get no loans from banks and depend entirely on money lenders, and will not benefit, Besides, rural India is full of family holdings rather thanindividual holdings, and family holdings will typically be much larger than two hectares even for dirt-poor farmers, who will, therefore, be denied the 100% waiver. It will thus fail in both it economic and political objectives. IRDP loans to the rural poor in the 1980s demonstrated that crooked bank officials demand bribes amounting to one-third the intended benefits. Very few of the intended beneficiaries who **merited** relief received it. After the last farm loans waiver in 1990, many banks went slow on fresh farm loans for some years. This waiver will similarly slow down fresh loans to deserving farmers. While over dues to co-operatives may be higher, economist SurjitBhalla says less than 5% of farmer loans to banks are overdue, i.e. overdues exist for only 2.25 million out of 90 million farmers. If so, then the 95% who have repaid loans will not benefit. They will be angry at being penalized for honesty.

The budget thus grossly overestimates the number of beneficiaries. It also underestimates the negative effects of the waiver–encouraging willful defaults in future and discouraging fresh bank lending forsome years. Instead of trying to reach the needy through a **plethora** of leaky schemes we should transfer cash directly to the needy, using new technology like biometric smart cards, which are now being used in many countries, and mobile phone bank accounts. Then benefits can go directly to phone accounts operable only by those with biometric cards, ending the massive leakages of current schemes.

The political benefits of the loan waiver have also been exaggerated since if only a small fraction offarm families'benefit and many of these have to pay massive vote-winner? Members of joint families

will feel **aggrieved** that, despite having less than one hectare per head, their family holding is too largeto qualify for the 100% waiver. All finance ministers, of the central or state governments, give away freebies in their last budgets, hoping to win electoral regards. Yet, four-fifths of all **incumbent** governments are voted out. This shows that beneficiaries of favour are not notably grateful, while those notso favored may feel aggrieved, and vote for the Opposition. That seems to be why election budgets constantly fail to win elections in India and the loan waiver will not change that pattern.

Q.151. Why do economists feel that loan waivers will benefit farmers in distress?
a) It will improve the standard of living of those farmers. who can afford to repay their loans but are exempted.
b) Other government relief measures have proved ineffective.
c) Suicide rates of farmers have declined after the announcement of the waiver.
d) Farmers will be motivated to increase the size of their family holdings not individual holdings.
e) The government will be forced to reexamine and improve the public distribution system.

Q.152. What message will the loan waiver send to farmers who have repaid loans?
a) The government will readily provide them with loans in the future.
b) As opposed to money lenders, banks are a safer and more reliable source of credit.
c) Honesty is the best policy
d) It is beneficial to take loans from co-operatives since their rates of interest are lower.
e) None of these

Q.153. What is the author's suggestion to provide aid to farmers?
a) Families should split and joint holding to take advantage of the loan waiver.
b) The government should increase the reach of the employment guarantee scheme
c) Loans should be disbursed directly into bank accounts of the farmer using the latest technology.
d) Government should ensure that loan waivers can be implemented over a number of years.
e) Rural infrastructure can be improved using schemes which were successful abroad.

Q.154. What was the outcome of IRDP loans to the rural poor?
a) The percentage of bank loans sanctioned to family owned farms increased
b) The loans benefited dishonest money lenders, not landless labors.
c) Corrupt bank officials were the unintended beneficiaries of the loans.
d) It resulted in the government sanctioning thrice the amount for the current loan waiver.
e) None of these

Q.155. What are the terms of the loan waiver?

Mobile banking (M banking) involves the use of a mobile phone or any other mobile device to **(191)**financial transactions linked to a client's account. M banking is new in most countries and most mobile payments models even in developed countries today operate on a **(192)** scale. A mobile network offers a (**193**) available technology platform onto which other services can be provided at low cost with effective results. For example, M banking services which use **(194)** such as SMS can be carried at a cost of less than one US cent per message. The low cost of using existing infrastructure makes such services more **(195)** to be used by customers with lower purchasing power and opens up access to services which did not reach them earlier due to **(196)** cost of service delivery. Although M banking is one aspect in the wider **(197)** of e-banking there are reasons to single it out for focus especially because there are a lot more people with mobile phones than bank accounts in India. M banking could provide a **(198)** solution to bring more "unbanked" people to the financial mainstream. Without traditional credit, individuals are **(199)** to exploitation by abusive lenders offering very high interest rates on short term loans. Also of considerable importance are public safety implications for the unbanked–they are often victims of crime because many operate on a cash-only basis and end up carrying significant amounts of cash on their **(200)** or store cash in their homes.
