Q.34-39.A word and number arrangement machine when given an input line of words and numbersrearranges them following a particular rule in each step. The following is an illustration of inputand rearrangement.
Input : go now 52 38 17 for again 65
Step I : 65 go now 52 38 17 for again
Step II : 65 again go now 52 38 17 for
Step III : 65 again 52 go now 38 17 for
Step IV : 65 again 52 for go now 38 17
Step V : 65 again 52 for 38 go now 17
Step VI : 65 again 52 for 38 go 17 now
Step VI is the last step of the rearrangement.

As per the rules followed in the above steps, find out in each of the following questions theappropriate step for the given input.

Q.34. Input: home turf 39 24 86 44 roll over
Which of the following steps will be the last?
a) X
b) IX
c) VIII
d) VII
e) None of these

Q.35. Step III of input is:**94 car 86 window shut 52 31 house**
Which of the following is definitely the input?
a) 94 car window 86 shut 52 31 house
b) 86 window 94 car shut 52 31 house
c) car shut window 86 52 31 house 94
d) Cannot be determined
e) None of these

Q.36. Step IV of an input is:**58 box 47 dew 15 21 town pot**
Which of the following steps will be the last?
a) VII
b) VI
c) VIII
d) IX
e) None of these

Q.37. Input: show 51 36 new far 81 46 goal
Which of the following steps will be the last but one?
a) VII
b) VIII
c) VI
d) V
e) None of these

Q.38. Input: buywin task 52 38 43 door 12
Which of the following will be step IV?
a) 52 buy 43 door 38 task 12 win
b) 52 buy 43 door 38 task win 12
c) 52 buy 43 door task win 38 12
d) There will be no such step
e) None of these

Q.39. Step II of an input is : **76 ask 12 32 begin over join 42**
How many more steps will be required to complete the rearrangement?
a) Four
b) Five
c) Six
d) Three
e) None of these

In each question below is given a group of letters followed by a combination of digit/symbolsnumbered a), b), c) and d). You have to find out which of the combination correctly representsthe group of letters based on the following coding

system and conditions. If none of thecombinations correctly represents the group of letters give e) i.e. 'None of these' as your answer.

Letters : M R I T J P Q E U D A F H W

Digit/SymbolCode: 8 4 9 5 1 # @ 2 6 © 3 $ * 7

Conditions :

(i) If the first letter is a consonant and the last letter is a vowel, the codes are to be interchanged,

(ii) If the first letter is a vowel and the last letter is a consonant both are to be coded as %.

(iii) If both the first and the last letters are vowels, both are to be coded as the code for the firstletter.

TEST - IV
ENGLISH LANGUAGE
Read the following passage carefully and answer the questions given below it. Certain words have been printed in **bold** to help you locate them while answering some of the questions.

Goldman Sachs predicted that crude oil price would hit $200 and just as it appeared thatalternative renewable energy had a chance of becoming an economically viable option, the international price of oil fell by over 70%. After hitting the all-time high of $147 a barrel, a month ago, crude fell to less than $40 a barrel. What explains this sharp decline in the international price of oil? There has not been anymajor new discovery of a hitherto unknown source of oil or gas. The short answer is that the demand does not have to fall by a very sizeable quantity for the price of crude to respond as it did. In the short run, the price elasticity of demand for crude oil is very low. **Conversely**, in the short run, even a relatively big change in the price of oil does not immediately lower consumption. It takes months, or years, of high oil price to **inculcate**habits of energy conservation.World crude oil price had remained at over $60 a barrel for most of 2005-2007 without making any major **dent** in demand.

The long answer is more complex. The economic slowdown in the US, Europe and Asia alongwith dollar depreciation and commodity speculation have all had some role in the downward descent in the international price of oil. In recent years, the supply of oil has been rising but not enough to catch up with the rising demand, resulting in an almost vertical escalation in its price.

The number of crude oil futures and options contracts have also increased manifold which hasled to significant speculation in the oil market. In comparison, the role of the Organization of Petroleum Exporting Countries (OPEC) in fixing crude price has considerably weakened. OPEC is often accused of operating as a cartel restricting output thus keeping prices artificially high. It did succeed in setting the price of crude during the 1970s and the first half of the '80s. But, with increased futures trading and contracts, the control of crude pricing has moved from OPEC to banks and markets'that deal with futures trading and contracts. It is true that most oil exportingregions of the world have remained politically unstable **fuelling** speculation over the price ofcrude. But there is little evidence that the geopolitical

uncertainties in west Asia have improvedto **weaken** the price of oil. Threatened by the downward slide of oil price, OPEC has, in fact, announced its decision to curtail output.

However, most oil importers will heave a sigh of relief as they find their oil import bills declineexcept for those who bought options to import oil at prices higher than market prices. Exporting nations, on the other hand, will see their economic prosperity slip. Relatively low price of crude is also bad news for investments in alternative renewable energy that cannot compete with cheaper and non-renewable sources of energy.

Q.176. What does the phrase "the price elasticity of demand for crude oil is very low" imply?
a) When the price rises the demand for crude oil falls immediately.
b) A small change in demand will result in a sharp change in the price of crude.
c) Within a short span of time the price of crude oil has fluctuated sharply.
d) Speculation in oil does not have much of an irnpact on its price.
e) None of these

Q.177. Which of the following factors is responsible for rise in speculation in crude oil markets?
